

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### A'Beckett.—*The Comic History of England.*

By Gilbert Abbott A'Beckett. Illustrated with 20 Colored Etchings, and 240 humorous Wood-Cuts. 2 vols. 8vo. Cloth, \$5.

As the original design of this history was only to place facts in an amusing light, without a sacrifice of fidelity, it is presumed that truth has rather gained than lost by the mode of treatment that has been adopted. Persons and things, events and characters, have been deprived of their false coloring, by the plain and matter-of-fact spirit in which they have been approached. The author has never scrupled to take the liberty of tearing off the masks and fancy dresses of all who have hitherto been presented in disguise to the notice of posterity. Motives are treated in these pages as unceremoniously as men; and as the human disposition was much the same in former times as it is in the present day, it has been judged by the rules of common sense, which are alike at every period.

### A'Beckett.—*The Comic History of Rome.*

Illustrated with Colored Etchings, and numerous Wood-Cuts. 1 vol. 8vo. Cloth, \$2 50.

It may with confidence be asserted, that, from the attention and care bestowed upon this work, it will be found to form (irrespective of its claims to amuse) by no means the least compendious and correct of the histories already in existence of Rome to the end of the Commonwealth.

**A NEW, CHEAP, AND MOST VALUABLE ENCLYCOPÆDIA.**

**D. APPLETON & CO.**

Have in course of Publication in concert with the London Publishers,

**THE ENGLISH CYCLOPÆDIA.**

**A New Dictionary of Universal Knowledge.**

**Illustrated with Upwards of Five Thousand Wood Engravings.**

**EDITED BY MR. CHARLES KNIGHT.**

*Many of the articles written by the most Eminent Scholars and Scientific Men of the Day.*

Upon completing the first two volumes of the "THE ENGLISH CYCLOPÆDIA"—namely, one of GEOGRAPHY, and one of NATURAL HISTORY—the public attention to the distinctive character of this work is respectfully requested by the Publishers.

"THE ENGLISH CYCLOPÆDIA," as now announced, is based upon "The Penny Cyclopædia of the Society for the Diffusion of Useful Knowledge." The copyright of that great work being the property of Mr. Knight, he alone had the power of remodelling it throughout, so as to adapt the original materials to the existing state of knowledge. The amount of literary labor which this adaptation has involved will at once be seen by any one who will compare the present work with the original. It has not been a labor merely of correction and revision: it has involved the necessity of introducing a great body of newly-written matter. The changes which have elapsed since "The Penny Cyclopædia" was commenced, twenty years ago, have rendered every branch of information in some degree a new study. In "THE ENGLISH CYCLOPÆDIA" no diligence has been spared to collect every fact not previously recorded; to systematize articles that from the long course of publication of the original work were disconnected to make the references complete; and truly to present, as far as a "DICTIONARY OF UNIVERSAL KNOWLEDGE" can present, the advanced opinions of our own times.

During the progress of its completion, it has become more and more evident that the plan of issuing "THE ENGLISH CYCLOPÆDIA" in Four Divisions is a judicious arrangement. It has the obvious advantage of completing, in a comparatively short space of time, large departments of knowledge with the most recent information. Finishing the great branches of Geography and Natural History in two years, the beginning and the end of each series will not present different aspects, the one somewhat antiquated, the other perfectly fresh. The editorial labor, too, being more condensed, the relations and proportions of each article and subject can be better preserved. The old materials were of the highest value; but the edifice required to be rebuilt; and thus "THE ENGLISH CYCLOPÆDIA" is essentially a new Cyclopædia; not only taking a new form, but new in all the essentials of literary novelty.

It is necessary to add, that an ATLAS to accompany the Geographical Division of "THE ENGLISH CYCLOPÆDIA" will be prepared; but as it will not be an isolated collection of Maps, but one adapted to the text of the Cyclopædia, it will not be issued till the work is more advanced; and thus the most recent information will be therein embodied.

"THE ENGLISH CYCLOPÆDIA" will be comprised in four Divisions, each having its own alphabetical arrangement, and each forming, when complete, four distinct volumes.

Price, only \$1 a volume in cloth, or \$2 50 in calf extra.

"Strangely enough, we have never had as yet any thing at all approaching a satisfactory edition of the English poets. We have had Johnson's, and Bell's, and Cooke's, and Sharpe's small sized editions—we have had the one hundred volume edition from the Chiswick press—we have had the double-columned editions of Chalmers and Anderson—and we have the, as yet, imperfect Aldine edition; but no series has hitherto given evidence that a man of cultivated taste and research directed the whole."—*Athen.*

The splendid series of books now offered to the public at such an unusually low rate of charge, will be got up with all the care and elegance which the present advanced state of the publishing art can command.

The well-known literary character and ability of the editor is sufficient guaranty for the accuracy and general elucidation of the text, while the paper, printing, and binding of the volumes will be of the highest class, forming, in these respects, a striking contrast to all existing cheap editions, in which so few efforts have been made to combine superiority in production with low prices.

Under the impression that a chronological issue of the Poets would not be so acceptable as one more diversified, it has been deemed advisable to intermix the earlier and the later Poets. Care, however, will be taken that either the author or the volumes are in themselves complete, as published; so that no purchaser discontinuing the series at any time, will be possessed of imperfect books.

The absence in the book market of any handsome uniform series of the Popular British Poets, at a moderate price, has induced the publishers to project the present edition, under the impression that, produced in superior style, deserving a place on the shelves of the best libraries, and offered at less than one half the usual selling price, it will meet that amount of patronage which an enterprise, based on such liberal terms, requires.

The series will conclude with a few volumes of fugitive pieces, and a History of British Poetry, in which selections will be given from the writings of those authors whose works do not possess sufficient interest to warrant their publication as a whole.

It is believed that this will render the present edition of the British Poets the most complete which has ever been issued, and secure for it extensive support. The series is intended to include the following authors:—

*Engineer's Pocket Companion.* Comprising Decimal Arithmetic, Tables of Square and Cube Roots, Practical Geometry, Mensuration, Strength of Materials, Mechanic Powers, Water Wheels, Pumps and Pumping Engines, Steam Engines, Tables of Specific Gravity, &c., &c. Also, a Series of Mathematical Tables, containing the Circumferences, Squares, Cubes, and Areas of Circles, Superficies, and Solidity of Spheres, &c., &c. By W. Templeton. From the Eighth English Edition, with Important and Useful Additions, by a Practical American Engineer. 16mo., with tuck, \$1 25.

"A practical engineer, to whose judgment we have submitted this work, pronounces it one of the best publications of the kind that has been issued from the American press. Mr. Adams, the American editor, is an engineer of conceded standing and ability, and has acquitted himself creditably in his portion of the work."—*Buffalo Times.*

## BASNETT.—OUTLINES OF A MECHANICAL

*Theory of Storms.* Containing the True Law of Lunar Influence, with Practical Instructions to the Navigator, to enable him approximately to calculate the coming changes of the Wind and Weather, for any given Day and for any part of the Ocean. By J. Basnett. With Illustrations. 1 vol. 12mo. Price \$1.

"It is a manual of weather changes, such as Professors Redfield, Eddy, and others, will examine with interest; and whatever may be thought of the author's speculations, his book is full of information and acuteness."—*Scientific American.*

"This book claims to develop a new theory of storms, and to be a step in advance of present knowledge of Meteorology. It discusses a complex subject, and one seemingly beset with greater difficulties than encompass other fields of science. The weather is, least of all, subject to fixed known rules, and weather prophecies are proverbially fallacious. This book proposes to shed some light upon that problem."—*Scientific Gazette.*

"The distinguished feature of this work is the vast amount of practical information it contains."—*Artisan.*  
"No book ever published conveys more useful and practical information on the subject than this Catechism. As a popular treatise it is, beyond comparison, the best and fullest we have yet seen."—*Railway Gazette.*

## ALLEN.—PHILOSOPHY OF THE ME-

*chanics of Nature and of the Source and Modes of Propagation of Natural Motive Powers.* By Z. Allen. One vol. octavo. Cloth, \$3 50.

## OVERMAN.—METALLURGY.

Embracing the Elements of Mining Operations, and Analyses of Ores: a full Description of all Smelting and other Operations for the Production of Metals from the Ores. With numerous Wood-Engravings of Machinery, Furnaces, and Apparatus. By Frederick Overman, Author of "A Treatise on the Manufacture of Iron, &c." One volume, octavo, of over 600 pages. \$5.

"It has never been our lot to notice a work more deserving of public approval than this. It is the last production of a true student of science, and noble of nature, Frederick Overman, who died on the 7th of January last, in Philadelphia. This work is designed to present a practical view of the various and extensive operations of Metallurgy. Every division of this science contains a philosophical investigation of the apparatus used, and the operations performed in all similar cases, as well as the principles upon which their advantages depend. In a word, this work will be found to contain practical information in advance of all other works on Mining and Metallurgical operations, with descriptions of Charcoal, Coke, and Anthracite Furnaces, Blast Machines, Rolling Mills, &c."—*Scientific Amer.*

## KNAPEN.—THE MECHANIC'S ASSIST-

# A NEW, CHEAP, AND MOST VALUABLE ENCYCLOPÆDIA.

*D. APPLETON & CO.*

Have in course of Publication in consort with the London Publishers,

## THE ENGLISH CYCLOPÆDIA.

*A New Dictionary of Universal Knowledge.*

**Illustrated with Upwards of Five Thousand Wood Engravings.**

**EDITED BY MR. CHARLES KNIGHT.**

*Many of the articles written by the most Eminent Scholars and Scientific Men of the Day.*

Upon completing the first two volumes of the "THE ENGLISH CYCLOPÆDIA"—namely, one of GEOGRAPHY, and one of NATURAL HISTORY—the public attention to the distinctive character of this work is respectfully requested by the Publishers.

"THE ENGLISH CYCLOPÆDIA," as now announced, is based upon "The Penny Cyclopædia of the Society for the Diffusion of Useful Knowledge." The copyright of that great work being the property of Mr. Knight, he alone had the power of re-modelling it throughout, so as to adapt the original materials to the existing state of knowledge. The amount of literary labor which this adaptation has involved will at once be seen by any one who will compare the present work with the original. It has not been a labor merely of correction and revision; it has involved the necessity of introducing a great body of newly-written matter. The changes which have elapsed since "The Penny Cyclopædia" was commenced, twenty years ago, have rendered every branch of information in some degree a new study. In "THE ENGLISH CYCLOPÆDIA" no diligence has been spared to collect every fact not previously recorded; to systematize articles that from the long course of publication of the original work were disconnected to make the references complete; and truly to present, as far as a "DICTIONARY OF UNIVERSAL KNOWLEDGE" can present, the advanced opinions of our own times.

During the progress of its completion, it has become more and more evident that the plan of issuing "THE ENGLISH CYCLOPÆDIA" in Four Divisions is a judicious arrangement. It has the obvious advantage of completing, in a comparatively short space of time, large departments of knowledge with the most recent information. Finishing the great branches of Geography and Natural History in two years, the beginning and the end of each series will not present different aspects, the one somewhat antiquated, the other perfectly fresh. The editorial labor, too, being more condensed, the relations and proportions of each article and subject can be better preserved. The old materials were of the highest value; but the edifice required to be rebuilt; and thus "THE ENGLISH CYCLOPÆDIA" is essentially a NEW Cyclopædia; not only taking a NEW form, but NEW in all the essentials of literary novelty.

It is necessary to add, that an ATLAS to accompany the Geographical Division of "THE ENGLISH CYCLOPÆDIA" will be prepared; but as it will not be an isolated collection of Maps, but one adapted to the text of the Cyclopædia, it will not be issued till the work is more advanced; and thus the most recent information will be therein embodied.

"THE ENGLISH CYCLOPEDIA" will be comprised in four Divisions, each having its own alphabetical arrangement, and each forming, when complete, four distinct volumes.

The following quotation from the author's preface illustrates the leading features of this publication :

"I have embodied in this work the results of my long experience as a Professor of Practical Science. Since the year 1805, when I entered at an early age upon the arduous task of conducting the schools of chemistry and manufactures in the Andersonian Institution, up to the present day, I have been assiduously engaged in the study and improvement of most of the chemical and many of the mechanical arts. Consulted professionally by the proprietors of factories, workshops, and mines of various descriptions, both in this country and abroad, concerning derangements in their operations, or defects in their products, I have enjoyed peculiar opportunities of becoming acquainted with their minutest details, and have frequently had the good fortune to rectify what was amiss or to supply what was wanting. Of the stores of information thus acquired, I have availed myself on the present occasion; careful, meanwhile, to neglect no means of knowledge which my extensive intercourse with foreign nations affords.

I therefore humbly hope that this work will prove a valuable contribution to the literature of science, serving—

*In the first place* to instruct the Manufacturer, Metallurgist, and Tradesman in the principles of their respective processes, so as to render them, in reality, the masters of their business; and to emancipate them from a state of bondage to such as are too commonly governed by a blind prejudice and a vicious routine.

*Secondly*, To afford Merchants, Brokers, Drysalters, Druggists, and Officers of the Revenue, characteristic descriptions of the commodities which pass through their hands.

*Thirdly*, By exhibiting some of the finest developments of Chemistry and Physics, to lay open an excellent practical school to students of these kindred sciences.

*Fourthly*, To teach capitalists who may be desirous of placing their funds in some productive branch of industry, to select judiciously among plausible claimants.

*Fifthly*, To enable gentlemen of the Law to become well acquainted with the nature of those patent schemes which are so apt to give rise to litigation.

*Sixthly*, To present to Legislators such a clear exposition of the staple manufactures, as may dissuade them from enacting laws which obstruct industry, or cherish one branch of it to the injury of many others.

*And lastly*, To give the general reader, intent, chiefly, on Intellectual Cultivation, views of many of the noblest achievements of Science in effecting those grand transformations of matter to which Great Britain owes her paramount wealth, rank, and power among the nations of the earth.

The latest statistics of every important object of manufacture is given, from the best, and, usually, from official authority, at the end of each article.

**CRITICISMS OF THE PRESS.**

"In every point of view, a work like the present can but be regarded as a benefit done to science, to commerce, and industry, and an important addition to a species of literature, the exclusive production of the present century, and the present state of peace and civilization."—*London Athenæum*.

"Together with the *Commercial Dictionary* of Mr. McCulloch, it would supply the merchant and manufacturer with the fullest statistics of commerce, and the most accurate scientific and practical knowledge applicable to manufactures and commerce, in their present condition and prospective capabilities. The work should be on the desk of every counting-house and warehouse in the kingdom, side by side with the *Dictionary of Commerce*."—*Glasgow Chron.*

"The most complete encyclopedia of useful science that has ever issued from the press."—*United Service Gazette*.

"It not only treats of the application of chemistry to the arts and manufactures, but it also enters very fully into the mechanical arrangement of the building, the *plans and implements of a great variety of trades, on*

which it communicates much lucid and well-arranged information. It is compiled with great care, and besides containing the latest materials, is strictly confined to what is useful without superfluous detail."—*Civil Engineer*.

"Dr. Ure's reputation precludes the necessity of our saying any thing in proof of the accuracy and sterling worth of this publication. It is designed to embody the results of his long experience as a Professor of Practical Science, and will be found to supply a mass of important information to Manufacturers, Engineers, Chemists, and other numerous classes. It is drawn up in a style at once exact and popular, and is so well illustrated as to be level to the comprehension of the generality of readers. As a book of reference, it is invaluable, and as such must speedily find its way into every well selected library."—*Eclectic Review*.

"A book much wanted. It contains a mass of information important to the generality of readers, divested of the difficulties of technicality and pedantry, which generally confuse and deter the mere common sense and common capacity student."—*London Times*.

# LYELL'S GEOLOGIES.

D. APPLETON AND COMPANY

HAVE RECENTLY PUBLISHED NEW EDITIONS OF

## I. A MANUAL OF ELEMENTARY GEOLOGY;

Or, the Ancient Changes of the Earth and its Inhabitants,

AS ILLUSTRATED BY GEOLOGICAL MONUMENTS.

BY SIR CHARLES LYELL, M. A., F. R. S.,

*Author of "Principles of Geology," &c. &c.*

Reprinted from the last London, Entirely Revised Edition. Illustrated with 500 Wood-Cuts,  
One large 8vo. Price \$1 75.

"The author of this work stands in the very front rank of scientific men, and his works upon the sciences, to which he has devoted his great powers, and his indefatigable study, are the standard books upon those subjects. This Manual has had a very great sale in England, and its successive editions have kept pace with the steady progress of geological science. To the last edition, new and important pages have been added, containing the latest discoveries in geology. This study has never before received so great attention as at present, and in no other country can it be studied so profitably and with such practical results as in this."—*Providence Journal*.

"This is a standard work, on one of the most wonderful of modern sciences. In connection with the "Principles of Geology," by the same author, it gives a complete survey of the science at its present stage of advancement. We commend these works to the serious attention of those fossil theologians who esteem it their duty to bring the Bible, if they can, into conflict with the inductive sciences, and who think that their interpretation of Genesis is a sufficient reply to all the inductions of Geology."—*Recorder*.

## II. PRINCIPLES OF GEOLOGY;

Or, the Modern Changes of the Earth and its Inhabitants.

New and Entirely Revised Edition. Illustrated with numerous Maps, Plates, and Wood-Cuts. 1 vol. 8vo., pp. 846. \$3 25.

"Limited space precludes our enlarging on the contents of this rich volume, exhibiting the history of our planet and the theory of our species, of the duration of past time, of igneous force and its effects, and of those causes producing the various phenomena disporting over the ever-changing surface of our globe.

Geology is intimately related to nearly all the physical sciences, and it were therefore desirable that the student be well versed in chemistry, mineralogy, zoology, botany, and in every branch embracing the subjects of organic and inorganic nature. Cosmogony, or the origination of the earth, with which this science has been often confounded, is a distinct theory and in no wise concerned with geology."—*The Cultivator*.

## GOTHIC ARCHITECTURE

### APPLIED TO MODERN RESIDENCES.

By D. H. ARNOT, ARCHITECT.

Containing 48 Plates, some colored. 1 vol. 4to. Cloth, \$4.

To select from the simple elements of design the most applicable and intelligible forms, and combine them in the most useful and imposing manner, without affectation or distortion, is considered the great aim and duty of the architect. Although numerous specimens and adaptations of Gothic art are already before the public, still they relate to plans and purposes foreign to the taste and practice of this country; consequently, in this particular branch of art, this work may be considered as the first attempt to supply a want which has long been felt.

- CHAPTER XII.—Lines of Beauty and Taste.—Heads and Sterns.—Compend of all the rules for Masting and Sparring vessels of all descriptions.—The Author's Improvements.

This work is designed to form the connecting link between Science and Practice, with a view to the elementary instruction of those who have not previously studied the principles of science in Modelling and Building Ships.

But, while it is designed as the novitiate's guide, it will be found to contain much information adapted to all branches of maritime enterprise; not only the elementary principles, but all the departments of this science, is distinctly explained, and illustrated by Plates and Diagrams. The subject of Masting and Sparring of Vessels is fully explained in its proper department.

Popularity has not been sought at the expense of science, nor brevity by the sacrifice of useful information and appropriate Illustrations.

To those who desire to possess a work on the Theory and Practice of Ship-building it is not too much to say, that an equal amount of information has never been offered to the mechanical world upon this subject at so small a price.

### TESTIMONIALS.

The following eminent Ship-Builders, &c., highly recommend the work to all persons who are desirous of obtaining information on the subjects of which it treats:—JACOB BELL, JACOB A. WESTERVELT, SMITH & DIMON, L. MCKAY, S. HARTT, Capt. W. SKIDDY, &c.; also, Mr. AUG. NORMAND, of Havre, one of the most scientific constructors in France, who says, "I have to thank you for that excellent book by Griffiths. This work embraces more substantial information and first principles than any other work published up to the present time."

NEW YORK, October, 1855.

NEW AND COMPLETE SYSTEMATIC SERIES  
OF  
**SCHOOL GEOGRAPHIES;**  
BY S. S. CORNELL.  
IN THREE PARTS.

Each book being arranged on the same plan, and with special reference to the wants and capacities of the class, or grade of scholarship for which it is designed, the series is progressive and philosophical in its nature, and practical in its operation.

**CORNELL'S PRIMARY GEOGRAPHY,**

Small Quarto. 50 Cents.

One of the leading objects in the preparation of this work, was to make it in every sense of the word what its title indicates, a "Primary Geography;" consequently only those branches of Geographical Science that admit of being brought fully within the comprehension of the youthful beginner, have been introduced into the present number of the series.

The youthful student is put in possession of a simple and easy method of memorizing the contents of a map, by means of a carefully systematized set of questions.

THE MAPS AND ILLUSTRATIONS ACCORD STRICTLY WITH THE CHARACTER OF THE LESSONS, each map containing all that is taught in its accompanying lessons—and nothing more.

The work is illustrated by upwards of seventy suggestive designs, exquisitely drawn and engraved FOR THIS BOOK.

The maps, twelve in number, are large, clear, and pleasing to the eye.

At desirable intervals, there is a systematic arrangement of promiscuous questions, designed as a review of preceding lessons, by which teachers, parents, trustees, and others, may satisfactorily ascertain, at any stage of the pupil's advancement, what he knows of the science.

A PRONOUNCING VOCABULARY, containing the names of all the natural and political divisions used throughout the work, is appended.

The mechanical execution of the work is equal or superior to that of any other school-book extant.

**CORNELL'S INTERMEDIATE GEOGRAPHY**

Large Quarto, 84 pp. 67 Cents.

This book clearly explains the terms used in the Physical, Political, and Mathematical branches of the science, and contains a judiciously selected and carefully systematized amount of Descriptive Geography.

It is also supplied with numerous appropriate and beautiful maps, and illustrated by a large number of well-executed wood-cuts, comprising views of places, etc., never before presented in any school work on the subject.

**CORNELL'S HIGH SCHOOL GEOGRAPHY**

AND COMPANION ATLAS.

ARE IN PRESS, AND WILL SHORTLY APPEAR.

The Geography is arranged for the pupils of advanced classes in Public and Private Schools. It has been prepared with much care to meet the requirements of the present age. Countries to which political change, or the progress of civilization, or the march of enterprise, has given new or increased interest, have been brought prominently forward, and their social and political condition described from the most recent information and the most reliable sources. This book is also ornamented with numerous useful and interesting wood-cuts, executed in the highest style of the engraver's art.

The Atlas contains numerous large and elegant Maps, which combine, in a high degree, accuracy with beauty of execution.

*Extract from Circular No. 8, issued by the Department of Public Instruction of the State of Indiana,—  
August 10th, 1855.*

"It is believed that the Text-books recommended by the former Board, and now in extensive use in our schools, are such as to furnish no valid cause for change, except the Geography, for which the present Board, after due consideration and patient examination, have resolved to substitute Cornell's Series, which, in their judgment, is sufficiently superior to the one formerly recommended, to justify the change, and hope that Township Boards will lend a hearty co-operation in effecting the introduction of these valuable text-books."

*From the President of Synodical College, (Griffin, Ga.)*

"Mr. J. J. Richards placed in my hands, some weeks ago, the first part of Cornell's Series of Geographies, which I gave a careful examination, and which I consider the *only* Primary Geography I have ever seen which seemed to me to be just the thing wanted by the young. The Teacher in the Department of Geography in the College agrees with me in pronouncing it the best Primary Geography we have ever used. If the author succeeds as well with the other parts as with this, I prophesy for the work a wide-spread popularity and extended usefulness."

## ANALYTICAL CLASS-BOOK OF BOTANY.

BY FRANCES H. GREEN.

PART I.—ELEMENTS OF VEGETABLE STRUCTURE AND PHYSIOLOGY. PART II.—SYSTEMATIC BOTANY. To which is added a Compendious Flora of the Northern States; with descriptions of more than 1000 different species.

Beautifully Illustrated Quarto, 1 Vol., \$1 50.

PRIMARY CLASS-BOOK OF BOTANY. Composed from First Part of the Analytical Class-Book, and designed for the use of common schools and families. Illustrated quarto. 75 cts.

*Extract from the Author's Preface.*

"Having been for several years a Teacher of Botany, I have had considerable opportunity of experimenting on the happiest means of imparting this delightful science. The importance of Pictorial Illustrations, systematically combined for regular exercises, early suggested itself. A new system of teaching was thence wrought out, consisting of a set of diagrams made to illustrate Oral Lessons; and the plan was eminently successful. Those Lessons and Diagrams are reproduced in the present work, with such extension and improvements as the written form, and the superior light and progress of the times, admit and demand. The illustrations are presented to the eye in large groups, and are either immediately, or very nearly, associated with the corresponding portions of the Text. They are designed to be used as regular exercises for study and recitation, the same as maps in Geography. They are, in fact, but a recapitulation of the text in another form; and thus, while they repeat the idea, they also give a pleasing variety to the lessons; and appealing from the eye to the mind, and the reverse, they awaken the most lively associations, tending to fix the impressions in the memory."

## THE ELEMENTS OF AGRICULTURE.

A BOOK FOR YOUNG FARMERS, WITH QUESTIONS, PREPARED FOR THE USE OF SCHOOLS

BY GEORGE E. WARING, JR.,

CONSULTING AGRICULTURIST.

12mo., 288 pages. \$0 75.

This is the latest publication on this subject, and all who have seen it concede that for simplicity, terseness, and practical usefulness, it is the best work on agriculture which has yet been written. No farmer or horticulturist should be without it. The Legislature of Vermont, at its recent session, authorized the purchase by the State of a sufficient number of copies to secure a full attention toward it, and made provision for its general introduction into every town and district school under its supervision.

### OPINIONS OF THE PRESS.

"This is the work of a young student and farmer in the neighborhood of our city. And we defy any man or boy who can read the plainest English to run through this little volume without gaining from it a clearer, more consistent, more exalted idea of agriculture as a pursuit, as well as a science, than he previously entertained. We fervently wish that it could speedily find a place, not only in every school library but in every cottage in the land; for we are sure its perusal would make farmers of many who are now sweltering and starving in cities, and good farmers who are now afflicting the soil only because they must do so or famish."—*New York Tribune*.

"It is just what is needed in every town where a ten-acre lot is cultivated."—*New York Times*.

"Mr. Waring has rendered a service to his favorite science by this contribution, and most ably has he performed the work."—*Working Farmer*.

"A treatise that, for its truth, contains as much useful and reliable information, and as little waste of words as any that has come under our notice."—*Practical Farmer*.

## **EASY LESSONS IN LANDSCAPE DRAWING.**

**IN SIX PARTS. BY F. N. OTIS.**

**Price, Parts 1, 2 & 3, each, 25 Cents. 4, 5 & 6, each, 37 Cents.**

These books are executed in a most beautiful and pleasing manner. The author has presented a series of lessons which will guide the learner in an easy, systematic and intelligent manner, from simple lines through the intricacies of foliage, light, shade, and perspective, to the lessons which nature on every hand presents to her loving students. The peculiarities of different kinds of foliage, and the most approved methods of presenting them, are fully dwelt upon.

The subject of Perspective, together with its practical application, is treated in a manner which cannot fail of being comprehended by all who will give them a proper degree of attention. The size of each book being about that of an ordinary sheet of foolscap paper, the author has been able to exhibit the peculiarities of every surface represented, enabling the pupil to see the effect, and the method by which that effect is produced.

**Above Bound in One Volume, Price \$2 25.**

## **DRAWING BOOKS OF ANIMALS.**

**IN FIVE PARTS. BY F. N. OTIS.**

**Price, Part Nos. 1 & 2, each, 25 Cents. No. 3, 37 Cents. Nos. 4 & 5, each, 50 Cents.**

These books are of the same size as the "Landscape Drawing," and as beautifully executed. They are designed to present to the learner the easiest and most instructive progression from the simple to the more difficult exercises.

Each book is accompanied by such directions and explanations, in regard to the method of execution, as will enable those desirous of improving, to progress without other instruction or assistance than their own observations and reflections will naturally suggest.

"These studies are well executed, and the pupil is made acquainted with the formation of each separate part of the animal, and thus gradually led on to the achievement of the complete work. Drawing is an interesting and amusing study, and parents will do well to place this book within the reach of their children."—*Phila. Inq.*

## CLASS-BOOK OF PHYSIOLOGY.

BY B. N. COMINGS, M. D.,

PROFESSOR OF PHYSIOLOGY, CHEMISTRY, AND NATURAL HISTORY IN CONNECTICUT STATE NORMAL SCHOOL.

12mo. 274 pages. Price \$1.

REVISED EDITION, WITH AN APPENDIX.

This book presents the subject of Physiology in a style clear and concise, and in a form peculiarly adapted to the use of schools. The structure, functions, and uses of the principal organs in man, are illustrated by such references to those of inferior animals as cannot fail to make Physiology a deeply interesting study.

*From M. Y. BROWN, Principal of Webster School, New Haven.*

"I have used Comings' 'Class Book of Physiology' for nearly two school terms in the First Department of my school. I am happy to say that I regard it the *best text-book* on this important branch with which I have any acquaintance. The subjects are systematically arranged; the principles, facts, and illustrations are clearly and fully represented to the pupil. I find that his introduction of 'Composition, Anatomy and Physics,' tends greatly to increase the interest of the pupil in this *most important* and necessary study. I therefore can cheerfully recommend this admirable work to my fellow-teachers as one of rare excellence, and hope it may take the rank it deserves as a text-book upon this subject."

*From ABRAHAM POWELSON, Jr., Teacher, Brooklyn, N. Y.*

"After a very careful examination of the Class-Book of Physiology, by Comings, I can freely say that I consider it a performance of superior excellence. It embodies a fund of information surpassing in importance and variety that of any other work of the kind which has come under my notice."

*From ANDREW J. WELLES, Glastenbury, Conn.*

"It appears to me admirably adapted to the purpose for which it was designed, and I think will readily be admitted into our schools.

"The illustrations are more complete, and in a style superior to any I have ever seen in a school-book, making it really attractive to the eye."

*From W. H. WELLS, Newburyport, Mass.*

"I have a class of sixteen or eighteen in Dr. Comings' Physiology, and like it much."

*From E. H. COLZ, Principal of High School, Collinsville, Conn.*

"Having used the 'Class-Book of Physiology' one term, I am prepared to pronounce it a most excellent book, and one that is really *adapted to the use of Schools*."

*From J. W. TUCK, Principal of High School, New Britain, Conn.*

"The Class-Book of Physiology is now used by a large class of students in the school under my care. The fortunate references to comparative physiology give great aid to the teacher, and lend new attraction and profit to the pupil in acquiring a knowledge of this important branch; while its arrangement, principles of hygiene, and scientific merit, render it a text-book superior to any of the kind I have previously adopted."

*From E. B. HUNTINGTON, Principal of High School, Waterbury, Connecticut.*

"The attempt to illustrate Human Physiology by the more easily ascertained process of Comparative Physiology, is a capital feature of the work, and I think the author's success in doing so will commend the book to the judgment of teachers, as I know it will render the science itself far more intelligible to the pupil."

## COMPANION TO THE CLASS-BOOK.

BY THE SAME AUTHOR.

12mo. 50 cents.

The Companion contains the *plates* of the class-book, accompanied with questions, to facilitate a method of teaching the sciences.

## CLASS-BOOK OF CHEMISTRY.

BY EDWARD L. YOUMANS.

12mo, 340 Pages. Price 75 Cents.

Every page of this book bears evidence of the author's superior ability of perfectly conforming his style to the capacity of youth. This is a merit rarely possessed by the authors of scientific school books, and will be appreciated by every discriminating teacher. While Chemistry is almost universally regarded by students as a dry and repulsive study (owing to the rigid and technical manner in which it is presented), Mr. Youmans' work will be found pre-eminent in clearness and simplicity of diction, by which the subject is made at once interesting and attractive. It is especially commended by the eminently practical manner in which each subject is presented. Its illustrations are drawn largely from the phenomena of daily experience, and the interest of the pupil is speedily awakened by the consideration that Chemistry is not a matter belonging exclusively to physicians and professors.

A book upon Chemistry, for the general use of schools, should not be a mere manual of laboratory operations, but a book of principles, clearly explained in their application to useful arts and affairs of life. Numerous teachers who use this work attest that it discloses this beautiful science in a new and attractive aspect.

*From H. F. LAURENCE, Principal of Academy, Ogdensburg.*

"Youmans' Chemistry is decidedly superior to any other with which I am acquainted."

*From PROF. WM. H. BIGELOW, Principal of Clinton Street Academy.*

"The eminently practical character of the Class-Book, treating of the familiar applications of the science, is in my opinion its chief excellence, and gives it a value far superior to any other work now before the public."

*From DAVID SYME, A. M., formerly Principal of the Mathematical Department, and Lecturer in Natural Philosophy, Chemistry and Physiology, in Columbia College.*

"MR. YOUMANS: DEAR SIR,—I have carefully examined your Class-Book on Chemistry, and, in my opinion, it is better adapted for use in schools and academies than any other work on the subject that has fallen under my observation.

"I hope that the success of your Class-Book will be proportionate to its merits, and that your efforts to diffuse the knowledge of Chemistry will be duly appreciated by the friends of education."

*From PROF. J. MULLIGAN, Principal of Young Ladies' School, New-York.*

"We have a large number of school-books for the purpose of giving elementary instruction in Chemistry—possessing various kinds and various degrees of merit; but of all which I have examined, I should prefer the Class-Book of Chemistry, as the most perspicuous in style and in method, and as containing the happiest selection of what is most interesting, and most practically valuable in the vast field of Chemical Science."

"Either for Schools or for general reading we know of no elementary work on Chemistry which in every respect pleases us so much as this."—*Com. Advertiser.*

"It is very practical; and whether for the use of schools or of private libraries, it is an appropriate, because as instructive and entertaining book."—*Nat. Intelligencer.*

"We have rarely met with an elementary scientific treatise which in clearness, brevity, and freedom from extraneous matter surpasses the present volume."—*Tribune.*

"A remarkably interesting and thoroughly popular work on Chemistry, recommended to the general reader by the clearness of its style, and its freedom from technicalities."—*Albion.*

"The author has happily succeeded in clothing his ideas in plain language—true eloquence—so as to render the subject both interesting and easily comprehended. The number of men who can write on science, and write clearly, is small; but our author is among that number."—*Scientific American.*

## CHEMICAL ATLAS;

### OR, THE CHEMISTRY OF FAMILIAR OBJECTS:

Exhibiting the general principles of the science in a series of beautifully colored diagrams, and accompanied by explanatory essays, embracing the latest views of the subjects illustrated. Designed for the use of students in all schools where chemistry is taught.

BY EDWARD L. YOUMANS.

Large Quarto. 105 Pages. \$2.

The Atlas is intended to accompany the author's Class-Book; but it may be employed with equal convenience and advantage in connection with any of the school text-books. It is to be used in exactly the same manner as a geographical atlas. As the pupil proceeds with the work in hand, whatever it may be, reference should be made to the diagrams as often as the subject may require. For example; when combining proportions, salts, combustion, or compound-radicals are reached, the plates which illustrate these subjects will be resorted to for assistance by those who possess the work. The text contains not only full explanations of the diagrams, but it consists of a series of essays or chapters upon the subjects illustrated.

The following expressions of opinion concerning the plan of illustrating Chemistry adopted in the present volume, are from the most eminent teachers and scientific men in the country. It will be seen that the testimonials refer to the Author's "Chemical Chart;" but as the "Atlas" is a reproduction and improvement of that mode of exhibiting chemical facts and phenomena, the commendations apply to this work with much greater force.

*From the HON. HORACE MANN, President of Antioch College.*

"I think Mr. Youmans is entitled to great credit for the preparation of his Chart, because its use will not only facilitate acquisition, but, what is of far greater importance, will increase the exactness and precision of the student's elementary ideas."

*From DR. JOHN W. DRAPER, Professor of Chemistry in the University of New York.*

"It seems well adapted to communicate to beginners a knowledge of the definite combinations of chemical substances, and deserves to be introduced into the schools."

"We cordially concur in the above opinion."

"JOHN TORREY, "Professor of Chemistry in the College of Physicians and Surgeons, New York.

"WM. H. ELLET, "Late Professor of Chemistry in Columbia College, S. C."

*From JAMES R. CHILTON, M. D., Chemist.*

"It is a valuable means of readily imparting a correct knowledge of the nature of chemical combinations."

*From DR. THOMAS ANTISSELL, Professor of Chemistry in the Vermont Medical College.*

"It will be found an invaluable assistant to both teacher and pupil."

*From PROF. GRAY, Author of text-books in Natural Philosophy and Chemistry.*

"The best means of illustration that I have seen; it would be especially useful to institutions not furnished with chemical apparatus."

*From DR. ROBERT HARR, Emeritus Professor of Chemistry in the University of Pennsylvania.*

"The design is excellent, and I entertain the impression that it is well done."

*From Professor W. F. HOPKINS, of the U. S. Naval Academy, Annapolis.*

"The plan is admirably adapted to assist the teacher in communicating, and the learner in receiving correct notions of the laws of chemical combinations. I commend it to the patronage of schools and academies."

*From Rt. Rev. ALONZO POTTER, LL. D., Philadelphia.*

"The conception embodied in Mr. Youmans' Chemical Chart is a very happy and useful one, and the execution is evidently the fruit of much care and skill. I should think its introduction into schools in connection with the study of the first principles of chemistry was much to be desired."

*From BENJAMIN SILLIMAN, LL. D., Professor of Chemistry in Yale College.*

"The plan appears to be an excellent one."

## THE CHILD'S FIRST HISTORY OF ROME.

BY MISS E. M. SEWELL.

18mo. Price 50 Cents.

In the preparation of this work for the use of children, the authoress has drawn her material from the most reliable sources, and incorporated them into a narrative at once unostentatious, perspicuous, and graphic, aiming to be understood by those for whom she wrote, and to impress deeply and permanently on their minds the historical facts contained in the book. The entire work is clothed in a style at once pleasing and comprehensible to the juvenile mind.

"The author of this work has been very successful in her style of narration, as well as gone to the best sources accessible for her facts. While there is nothing light and trivial in her manner, there is all the vivacity of the most lively fire-side story-teller; and those things, "of which it is a shame to speak," she gets over with great judgment, delicacy and tact. While it is eminently a child's book, we greatly misjudge if it should not prove a favorite with adults, especially that class who cannot command time to read protracted histories."—*Christian Mirror*.

## A FIRST HISTORY OF GREECE.

BY MISS E. M. SEWELL.

18mo. Price 63 Cents.

This work is designed to impart to young people a more clear and understandable knowledge of Grecian history than is attainable through any of the numerous works on that subject that have been accumulating during the last century. By selecting and presenting clearly and concisely only prominent characters and events, and not overloading and rendering their perusal irksome by a mass of minor details, the authoress has rendered an essential service to the youth of our country. With a view of lessening the perplexity which young minds encounter in the study of the History of Greece, in consequence of its involving events connected with numerous small states, the names of the most part of which are new to them, the authoress has appended a chapter containing the names of the Grecian States and the chief places connected with them.

"Miss Sewell is eminently successful in this attempt to set forth the history of Greece in a manner suited to the instruction of the young. The chronology is lucid, the events are well selected, and the narrative is perspicuous and simple. The facts and the method of prosecuting them are taken mainly from the work of Bishop Thirlwall, an excellent authority, and the work as a whole is the best with which we are acquainted for the use of children in their lessons of Grecian History, whether in the school room or the family circle."—*Providence Journal*.

"She has faithfully condensed her subject, from the Siege of Troy, B. C. 1184, to the destruction of Corinth, and the annexation of Greece, as a province to the Roman Empire, A. D. 141; forming a most excellent outline, to be filled up by the future acquisition of the reader. The chronological table of contemporary events attached is a valuable addition."—*Cincinnati Daily Times*.

## CLASS-BOOK OF ZOOLOGY.

BY PROF. B. JAEGER.

18mo. Price 43 Cents.

This work is designed to afford to pupils in common schools and academies a knowledge of the Animal Kingdom, not by making it a tiresome study, overloaded with incomprehensible technical terms taken from Latin and Greek, but as a scientific, amusing, instructive, and useful occupation for the juvenile mind, imparting a taste for collecting and preserving zoological specimens, and furnishing subjects for interesting conversation.

## FIRST LESSONS IN BOOK-KEEPING,

SINGLE AND DOUBLE ENTRY.

BY JOSEPH H. PALMER, A. M.

12mo. Price 19 Cents.

This little volume is progressively and logically arranged; each principle is clearly set forth by itself and illustrated, 1st, by "Slate Exercises," and 2d, by "Blank-Book Exercises." The practice is thoroughly taught by numerous exercises, in which the pupil opens the accounts and conducts and closes them himself.

BLANKS ACCOMPANYING THE SAME. 19 cents.

*From Jos. McKEEN, Supt. of Schools of the City of New York.*

"The arrangement of this work admirably combines the scientific and practical in a system of instruction which appears to be happily matured. It is well considered, and has in it more of *original adaptation* than is to be ordinarily met with in works upon this subject. I recommend it to the favor of business men and teachers of Book-keeping."

*"New York Free Academy."*

"DEAR SIR,

"It gives us pleasure to recommend your Treatise on Book-Keeping, and First Lessons introductory thereto, as admirably adapted to excite interest and secure proficiency in this important branch of practical education. We doubt not that your whole course furnishes a better aid in this department of study than can elsewhere be found.

## FIRST LESSONS IN GEOMETRY.

BY ALPHEUS CROSBY.

18mo. Price 38 Cents.

This little mathematical volume is founded upon the model of "First Lessons in Arithmetic," and abounds in illustrative questions both general and numerical, being an attempt to take advantage of their juvenile conceptions of place, form, and magnitude which the youthful mind conceives most easily and readily, and to give to them a scientific form and make them the foundation of elevated and accurate attainments—thus rendering Geometrical truths simpler and plainer, and bringing them within the reach of young children without sacrificing any of that strictness of demonstration which is the peculiar beauty of this science. That the author has been eminently practical and successful in this attempt will be seen by reference to the book.

## ARITHMETICAL SERIES.

BY GEO. R. PERKINS, LL. D.

### **PRIMARY ARITHMETIC.** 18mo. 160 pages. Price 21 Cents.

This work is in two parts. 1st, Intellectual Arithmetic, and 2d, Primary Written Arithmetic. It will be found to contain Mental Exercises enough to train, yet not enough to overburden the mind.

A minute analysis and illustration of Numeration.

A familiar treatment of the ground rules, including an education of the eye to quick combinations of the written digits.

An informal and extended explanation of the principles of Decimals, in connection with exercises in Federal Money.

Each lesson reviews the principles of the preceding one, yet in modes so varied, as to prevent the possibility of rote-learning.

### **ELEMENTARY ARITHMETIC.** 16mo. 350 pages. Price 42 Cents.

This work is peculiarly adapted to discipline the minds of those who study it.

No principle is left unelucidated, and new light is thrown upon many heretofore imperfectly illustrated.

The subject of Fractions, of Decimals, of Interest, of Partial Payments, etc., will, in their perspicuousness and their thoroughness, commend themselves to the examiner.

The subject of Proportion and Ratio is presented with peculiar force; as also, in Equation of Payments, the method of finding the Cash Balance.

The method of Extraction of the Cube Root is greatly preferable to the old method. It is far more concise and more comprehensive; saving nearly half the labor, and being applicable, with little variation, to the extraction of *all roots*. The new method is fully and beautifully explained in this work.

### **PRACTICAL ARITHMETIC.** 12mo. Cloth sides. Price 62 Cents.

This is designed for the use of such institutions as require more examples than are given in the Elementary Arithmetic, the number herein contained being about 4000. The almost universal expression of those who have used it is, that "It is the best and most complete Arithmetic published."

 Complete KEY to above, 12mo., 324 pp. 75 cents. (Just published.)

### **HIGHER ARITHMETIC.** 12mo. Sheep. Price 75 Cents.

This work is what its name purports, and develops Arithmetical principles higher than are usually found in other school Arithmetics, and fully explains the science of numbers and their application.

*From I. W. JACKSON, A. M., Professor of Mathematics in Union College.*

"The Higher Arithmetic is a work of an order superior to any that has been issued from the American press. Indeed, I am acquainted with no work on Arithmetic in the English language equal to it. I am confident that its general adoption as a Text-book, by our seminaries, would be considered by all who feel an interest in the promotion of the exact sciences, as an omen of good."

*From PROF. COOK and DR. CAMPBELL, of Albany Academy.*

"From all who have used the Elementary Arithmetic here, both teachers and scholars, we hear but one opinion, and that is most favorable. It is an excellent text-book, and we have no hesitation in recommending it to parents and pupils."

## D. APPLETON & COMPANY'S EDUCATIONAL TEXT-BOOKS.

*From J. WATSON WILLIAMS, Clerk of Board of School Commissioners of City of Uta.*

"This will certify that Perkins' Elementary and Higher Arithmetics have been adopted by the Board of School Commissioners, as text-books to be used in the Public Schools of this city."

*From T. M. RICE, Supt. of Schools, City of Buffalo.*

"Perkins' Elementary and Practical Arithmetics are exclusively used in the Public Schools of this city with entire satisfaction to both teachers and pupils."

*From H. B. HASWELL, Sec. of Board of Commissioners of Public Schools of the City of Albany.*

"Perkins' Primary and Elementary Arithmetics were unanimously adopted by the Board of School Commissioners of this city in the summer of 1851, and have since then been used to the exclusion of all others."

\*.\* In July, 1853, Perkins' Arithmetics were unanimously adopted for the use of all the Public Schools of New Orleans.

*From WM. HALL, Clerk of Board of Education, Syracuse.*

At a special meeting of the Board, held the 23d of September, 1853, it was unanimously "Resolved, That Perkins' Practical Arithmetic be substituted in the place of Greenleaf's National, in the Public Schools in this city."

*From GEORGE P. WILLIAMS, Professor of Math. and Nat. Phil., University of Michigan.*

"After an examination of the last editions of these works, I am prepared to repeat the opinion formerly expressed, that they are the best Arithmetics in use, or accessible in this part of our country."

*From A. H. LACKLEY, Beaver, Penn.*

"Perkins' Arithmetics are books eminently suited to our course of instruction. We have tried them, and our pupils seem to think them another great evidence of the just popularity of Prof. Perkins. They have been pronounced superior to all others. We shall use them from this time forth."

*From PROF. WALTER S. BOOTH, Southville, Conn.*

"Perkins' works contain many excellent and new ideas—his 'Higher Arithmetic' is the best deserving of its title of any *Higher Arithmetic* in use."

*From WILLIAM F. GOODWIN, New Bedford, formerly Principal of the Concord, N. H., High School.*

"I have examined the Arithmetic with much interest, and, so far as I am capable of judging, regard it as a work of excellent merit, and think it deserves an introduction into our High Schools and Academies."

"The most of the arithmetics now in use are, I think, deficient in diagrams to illustrate geometrically the square and cube roots. Such, however, is not the case with 'Perkins' Practical Arithmetic.' Chapter XVI. takes up the subjects (Involution and Evolution) and treats them in a manner which must meet the hearty approval of the best mathematicians in the country."

*From WM. L. EATON, Prof. of Mathematics, Branch of University, Kalamazoo, Mich.*

"I have examined Prof. Perkins' Arithmetics, and like them much for their conciseness and comprehensiveness, as well as the practical nature of their examples. The *Higher Arithmetic* is, in my opinion, what it purports to be, a *Higher Arithmetic*, and such a one as all those who design to be thoroughly acquainted with the science of numbers, should be familiar with."

*From the Chicago Daily Journal.*

"We have a copy of the Elementary Arithmetic lying before us, which is worthy of the patronage of all friends of education. Whether in the author's clear and brief elucidation of first principles, his treatment of that old 'Golden Rule' of numbers, the Rule of Three, his disposition of Fractions, his explanation of the Square and Cube Root, (so often roots of bitterness to the young learner), his exercises in analysis, or his admirable arrangement of the whole, there is much to commend and but little to condemn, and it is not so much a matter of wonder that Prof. P. has produced such a work, as that some one had not long ago anticipated him."

"Another feature of this work, is the nature of the problems, made up as they are, in a great measure, of important statistics, and valuable facts in Philosophy and History, which are thus unconsciously learned in acquiring a knowledge of the Arithmetic."

*From the Literary World of May 12, 1849.*

"This is by far the most scientific Elementary Arithmetic we have seen. There is a neatness of arrangement, a dispersion of matter, an accuracy and force of statement, which prepare the learner from the onset, for the handling of the higher mathematics."

## MATHEMATICAL WORKS

BY GEO. R. PERKINS, LL. D.

**ELEMENTS OF ALGEBRA.** 12mo. sheep. Price 75 cents.

Designed as an introduction to the Author's "Treatise on Algebra," and admirably adapted to the wants of common schools. The rules and definitions are simple and concise.

RE-WRITTEN AND THOROUGHLY REVISED, WITH THE ADDITION OF A LARGE NUMBER OF  
NEW EXAMPLES.

**TREATISE ON ALGEBRA**, embracing, besides the Elementary Principles, all the higher parts usually taught in Colleges; containing, moreover, the New Method of Cubic and Higher Equations, as well as the Development and Application of the more recently discovered Theorem of Sturm. 8vo. sheep, 420 pages. Price \$1 50.

The present edition has been carefully revised and considerably enlarged. One entire chapter, on the subject of Continued Fractions, treated in a general manner, has been added. The subject of RECURRING SERIES has been re-written and simplified, and many other important changes have been made.

**ELEMENTS OF GEOMETRY**, with Practical Applications. 12mo. sheep. Price \$1.

This work is distinguished from all other text-books on Geometry by applying the principles to practice as fast as explained, thus combining Theory and Practice.

**PLANE AND SOLID GEOMETRY**; to which is added, Plane and Spherical Trigonometry and Mensuration, accompanied with all the necessary Logarithmic and Trigonometric Tables. Large 8vo. 443 pages. \$1 50.

This work is designed to give an extended and comprehensive course of Geometry and its applications, adapted to the use of ADVANCED SCHOOLS and COLLEGES.

In the *First Part*, which is confined to the theoretical principles of Geometry, there is a clearness, distinctness, and novelty in the arrangement, classification, and demonstration of the various propositions, which cannot fail of giving pleasure to all who are fond of geometrical demonstration. The Author has founded this portion of his work on the Course of Geometry by VINCENT, the present standard French work.

Throughout the whole of the *Second Part*, which is of a more mixed or practical nature, the Author has successfully studied clearness and perspicuity. Spherical Trigonometry, which is generally looked upon as an intricate subject, and as one which it is very difficult fully to comprehend, is here made exceedingly simple and of easy application, each particular case being fully illustrated by numerical examples wrought out in full.

We might also speak in particular of the other portions of this work, as of Plane Trigonometry, of Mensuration, and, above all, of the accuracy and convenient arrangement of the Logarithmic Tables; but it is sufficient in this place to say, that the Author's long experience as a Professor of Mathematics has been brought to bear in the production of this work. He has spared no pains to make the whole acceptable to the mathematical student of the present age.

**PLANE TRIGONOMETRY**, and its application to Mensuration and Land Surveying, accompanied with all the necessary Logarithmic and Trigonometric Tables. 8vo. sheep. Price \$1 50.

The work will be found as simple and practical as the nature of the different subjects will admit, and differs in many respects from other similar works. The chapter upon the Division of Land is new and highly interesting to all lovers of the science. Great care has

*D. APPLETON & COMPANY'S EDUCATIONAL TEXT-BOOKS.*

been taken to have the tables accurate; they are from the old style of figures, which are less fatiguing to the eye than those in common use.

*From PROF. WM. M. GILLESPIE, of Union College.*

"Prof. Perkins' new Geometry I regard as the most important advance in the study of that science in this country, since Legendre's was substituted for Euclid's. That was a great step in progress; for, though the student may well begin with mastering the first book of Euclid for its method, life is too short to learn in that way all the truths of Geometry. But Legendre is now becoming antiquated in France, and his book is usually accompanied with additions and annotations. The most complete work is that of Vincent, edited by his well-known father-in-law, Bourdon. Prof. Perkins has wisely made this the basis of his new "Elements," which therefore deserves a very careful examination by every teacher. Its leading features are new and valuable, and the experience of Prof. Perkins as a teacher and a writer renders it probable that its details are equally good.

*From GIRARDUS B. DOCHARTY, Prof. of Math., Free Academy, New York.*

"I have examined, with more than ordinary interest, a 'Treatise on Algebra,' by George B. Perkins, LL. D., and also a 'Treatise on Plane Trigonometry,' by the same Author. I consider them both works of great merit. The 'Treatise on Algebra,' as a text-book, has no superior. Its arrangement is excellent; the Rules explicit; the explanations lucid, and the style in which it is written is well adapted to lead the tyro rapidly to a skilful knowledge of the higher analysis.

"The 'Treatise on Plane Trigonometry' is just such a manual as the pupils require. It contains every thing necessary for a correct understanding of the principles of the science and its practical application to the division of land. It will give me great pleasure at all times to recommend either of the above-named works to the teachers and students of my acquaintance."

*From B. W. W. REDFIELD, Asst. Prof. of Mathematics, N. Y. University.*

"I have examined, with much satisfaction, Perkins' Algebraic Series, and believe the Treatise is inferior to none in point of clearness, accuracy and logical development. For his Elementary work on Algebra, the author deserves the thanks of teachers. He seems to have been the first to discover that, even in the education of children, a course of conclusive reasoning may with profit supersede the old system of dogmatical dictation."

*From WM. J. ROLFE, recent Principal of Day Academy, Wrentham, Mass.*

"I have taken two classes through 'Perkins' Trigonometry,' and do not hesitate to place it very far above any similar work that I have ever taught. I do not believe there is a book before the public, which contains half as much practical matter on the subject of surveying. I have taken every opportunity to recommend it to my fellow-teachers, and have no doubt that some of them will adopt it."

*From CHARLES AVERY, A. M., A. A. S., Professor in Hamilton College.*

"I have examined Perkins' Algebra, and am pleased with it. I esteem it a valuable work of the kind, and do therefore cheerfully recommend it to the confidence and patronage of the public."

*From B. F. JOSLIN, Prof. of Mat. and Nat. Philosophy in the City of Boston.*

"The Treatise on Algebra by George B. Perkins, is evidently the work of an experienced and judicious teacher. The illustrations possess in a good degree the merits of simplicity and conciseness, whilst the prominence given to important theorems and rules, facilitates both recollection and reference."

*An eminent Professor of Mathematics, in speaking of Perkins' Elements of Geometry, says:*

"We have adopted it because it follows more closely the best model of pure geometrical reasoning, which ever has been, and perhaps ever will be exhibited; and because the author has condensed some of the important principles of the great master of geometricians, and more especially has shown that his theorems are not mere theory, by many practical applications; a quality in a text-book of this science no less uncommon than it is important."

*The Literary World, in speaking of Perkins' Plane Trigonometry and Surveying, says:*

"The Mathematical Series of Mr. Perkins has obtained a high reputation for clear and perspicuous arrangement, and an especial adaptation to the wants of practical men. These desiderata are not wanting in the present work."

"The rectangular system of calculating the areas of irregular plots of land, bounded by straight lines, is elegantly illustrated and accompanied by numerous examples. The tables of logarithms and logarithms of natural sines, &c., are printed in the form of type used in French mathematical works, and are, in other respects, valuable to students, mechanics, and surveyors."

## GILLESPIE'S LAND-SURVEYING: THEORETICAL AND PRACTICAL.

BY W. M. GILLESPIE, A. M., C. E.,

*Professor of Civil Engineering in Union College; Author of "Manual of Roads and Railways," &c.*

1 Vol. 8vo. 424 pages.

With FOUR HUNDRED Engravings; and a MAP showing the Variation of the Needle in the United States

This is the most complete, and, at the same time, fundamental work on this subject ever published in any country. Among its leading peculiarities are these:—

1. ALL the operations of surveying are developed from only *five simple principles*.
2. A complete system of surveying with only a chain, a rope, or any substitute, is fully explained.
3. Means of measuring inaccessible distances, in all possible cases, with the chain alone, are given in great variety, so as to constitute a *Land Geometry*. It occupies 26 pages, with 58 figures.
4. The Rectangular method of Compass-surveying is greatly simplified.
5. The Traverse Table gives increased accuracy in one fifteenth of the space of the usual tables.
6. The effect of the changes in the variation of the needle, on the re-survey of old lines, is minutely illustrated.
7. *Correct* tables of the times of elongation of the North Star are given; those in common use being in some cases nearly half-an-hour out of the way.
8. The adjustment of the engineer's Transit and Theodolite are here, for the first time, fully developed.
9. Methods of avoiding obstacles in angular surveying occupy 24 pages, with 85 figures.
10. Topographical Mapping is fully described with illustrations.
11. Laying out, Parting off, and Dividing up Land, are very fully explained, and illustrated by fifty figures.
12. The most recent improvements in the methods of Surveying the Public Lands of the United States, with the methods used for marking "corners," are minutely described from official authorities.

A double object has been kept in view in the preparation of the volume; viz., to make an introductory treatise easy to be mastered by the young scholar or the practical man of little previous acquirement, the only pre-requisites being Arithmetic and a little Geometry; and, at the same time, to make the instruction of such a character as to lay a foundation broad enough and deep enough for the most complete superstructure which the professional student may subsequently wish to raise upon it.

The volume is divided as follows:—

PART I. General Principles and Fundamental Operations.—II. Chain Surveying.—III. Compass Surveying.—IV. Transit and Theodolite Surveying.—V. Trigonometrical Surveying.—VI. Tri-linear Surveying.—VII. Obstacles in Angular Surveying.—VIII. Plane Table Surveying.—IX. Surveying without Instruments.—X. Mapping.—XI. Laying out, Parting off, and Dividing up Lands.—XII. United States' Public Lands.

APPENDIX.—A. Synopsis of Plane Trigonometry.—B. Demonstrations of Problems.—C. Levelling.

TABLES.—Chords for Platting.—Latitudes and Departures.—Natural Sines and Cosines.

### Opinions of the Press.

FROM PROF. E. S. SNELL, AMHERST COLLEGE.

"Please accept my thanks for the copy lately received of Gillespie's Surveying. I very much admire its systematic character, its completeness and fulness, and its adaptedness in all respects to the wants of the teacher, the pupil, and the practical surveyor. I have seen no work which can at all be brought in comparison with it."

FROM PROF. D. H. MAHAN, WEST POINT ACADEMY.

"In this Treatise Prof. Gillespie has given another evidence of his practical acquaintance with the wants of the teacher and pupil in his speciality, and of his ability to meet them. His work, which presents several new features in its plan, is written with such plainness, and illustrated with such copiousness of diagram and detail, as cannot fail to render it of easy attainment to the most ordinary comprehension."

## HAND-BOOKS OF THE ENGLISH LANGUAGE.

A HAND-BOOK OF ANGLO-SAXON ROOT-WORDS. 12mo. 50 Cents.

A HAND-BOOK OF ANGLO-SAXON DERIVATIVES. 12mo. 75 Cents.

A HAND-BOOK OF THE ENGRAFTED WORDS OF THE ENGLISH LANGUAGE. 12mo. \$1

BY A LITERARY ASSOCIATION.

The following statement will enable the reader to see at once the merits and peculiarities of the Hand-Books.

The English language consists of some *eighty thousand words*, drawn from five principal sources, viz.: from the Anglo-Saxon, Celtic, Gothic, French, and Latin and Greek, or Classic languages. *Twenty-three thousand* of these words are from the Anglo-Saxon. The whole twenty-three thousand words may be traced back to *one thousand root-words*. The twenty-two thousand have been formed by adding one or more root-words, or parts of them, together. There are now of these twenty-three thousand Anglo-Saxon words, only some six or seven thousand in good use. The remaining fifty-seven thousand words of the language, may also be traced back to a few thousand root-words in the languages from which they have been borrowed.

Every child should be early taught the whole six or seven thousand choice Anglo-Saxon words, because they are those continually used in the various occupation of life. Few scholars can use more than six thousand of the words drawn from Celtic, Gothic, French, and Classic sources. But there is no reason why every pupil in our public schools should not be able also to use them. Indeed, the three Hand-Books are so arranged that the six thousand choice Anglo-Saxon words, and the six thousand choice words from other sources, may be acquired easily in one year.

But to teach the English language successfully, the teacher should have clearly before his own mind, *its origin, growth, elements, or sources of formation, grammatical structure, general history, and literature*. The following synopsis throws light upon the English language.

I. *Its origin.* In 450 after Christ, the Angles and Saxons introduced into Great Britain the Anglo-Saxon language, which is the mother tongue of the present English.

II. *Its growth.* The root-words of the Anglo-Saxon, which are few, have grown into twenty-three thousand by the use of some eighteen prefixes, and twenty-five suffixes. Six or seven thousand only of these are now in good use. Again some fifty-seven thousand words have been introduced into it from several sources, but chiefly from the Celtic, Gothic, French, and Classic tongues. It embraces, in all, some eighty thousand words.

III. *Its periods of growth.* About 450 B. C., the Anglo-Saxon words were introduced into Britain; prior to 600, many Celtic words; before the end of the ninth century, many Gothic words; and at 1066, French words were intermixed; and since the revival of letters, in the fifteenth century, a large number of Greek and Latin words have been incorporated with it.

IV. *Its grammatical laws and history.* The Anglo-Saxon or root element, not only *modified* the words from the other languages, but gave them *its own laws*. Hence the grammar of the English language should be built on the Anglo-Saxon basis, and not on the basis of the Celtic, Gothic, French, or Latin and Greek.

V. *Its literature.* English Literature does not date back more than some six centuries. Nay, all that is really valuable has been produced during the last three hundred years.

The HAND-BOOK OF ANGLO-SAXON WORDS gives 1000 Anglo-Saxon root-words, with their primary and secondary meaning, and teaches the use of them.

THE HAND-BOOK OF ANGLO-SAXON DERIVATIVE WORDS. It explains the meaning of the prefixes, suffixes, and terminations which change the 1000 root-words into derivatives. It gives some 7000 of the choicest 23,000 words of Anglo Saxon origin, with their meanings and use.

THE HAND-BOOK OF THE ENGRAFTED WORDS OF THE ENGLISH LANGUAGE gives 7000 of the best words from the Celtic, Gothic, French and Classic tongues, with their meanings and use.

Every thing valuable in the Thesaurus, Latham, MacElligot, Lynn, and the Scholar's Companion, will be found in these books, and arranged according to the growth of language and the laws of mind. The plan is simple and natural.

## FIRST THOUGHTS; OR, BEGINNING TO THINK.

Illustrated 12mo., 109 pp. 50 Cents.

BY A LITERARY ASSOCIATION.

This volume is designed for the use of young pupils. It is of the greatest importance that the child should observe, name, and classify all its thoughts, every thing going on within and without. This Manual covers this ground, and gives practical and beautiful illustrations of the things familiar to childhood; nor can it be read without exciting the deepest interest in the mind of the child and parent.

## PRIMARY SPELLER AND READER.

BY ALBERT D. WRIGHT.

Price 12½ Cents.

This little volume of 144 pages, combines a Primary Spelling-book and Reader, happily illustrated with numerous cuts intended to attract the attention of the young, and to suggest thought for oral instruction and conversation.

It is confidently believed, that the proper use of this little book will obviate most of the difficulties experienced at the commencement of a child's education.

As fast as the letters are learned, an application is immediately made of them.

No word is given in which a letter occurs that has not been previously learned.

The capital letters are taught one at a time, and by review in reading lessons.

The words are systematically presented, being classified by their vowel sounds and terminating consonants; and generally, at the end of each class, they are arranged into little spelling lessons.

The learner is immediately initiated into reading lessons, composed of words of two or three letters, and is then led progressively into more difficult words.

The reading lessons are composed entirely of the words previously presented in the spelling lessons.

"This is an excellent little book for children, and an improvement on all other Primary Lessons."—*N. Y. Observer.*

"We most heartily commend it to the favorable regard of teachers and parents,"—*Teacher's Advocate.*

ELEMENTS OF READING AND ORATORY.	1 vol. large 12mo.	-	-	-	-	" 1 00

Great pains have been taken to make these books superior to any other reading-books in use, by reducing them to a complete practical system, founded on the nature of the language, by which the proper delivery of all sentences may be determined, and Reading elevated to the rank of a science. The proper and thorough use of these books places it in the power of every pupil to become an accomplished reader. The selections will be found to contain some of the finest gems in the language, which cannot fail of interesting the pupil, and cultivate a literary taste.

THE FIRST AND SECOND READERS introduce successively the different parts of speech, and are designed to combine a knowledge of their grammatical functions with the meaning and pronunciation of words.

THE THIRD AND FOURTH READERS commence with a series of exercises on articulation and modulation, containing numerous examples for practice on the elementary sounds (including errors to be corrected), and on the different movements of the voice produced by sentential structure, by emphasis, and by the passions.

**D. APPLETON & COMPANY'S EDUCATIONAL TEXT-BOOKS.**

---

The **COURSE OF READING** comprises three parts: the *first part* containing a more elaborate description of elementary sounds and of the parts of speech grammatically considered, than was deemed necessary in the preceding works; *part second*, a complete classification and description of every sentence to be found in the English, or in any other, language *part third*, paragraphs; or sentences in their connection unfolding general thoughts, as in the common reading-books.

THE **ELEMENTS OF READING AND ORATORY** closes the series with an exhibition of the whole theory and art of Elocution exclusive of gesture. It contains, besides the classification of sentences, the laws of punctuation and delivery deduced from it, the whole followed by carefully selected pieces for sentential analysis and vocal practice.

That the series is eminently practical and highly approved is shown by the following testimonials, selected from the thousands that have been received from public educators, who have tested them by thorough examination or actual use.

*From WALTER BAILLY, Supt. of Public Schools, Fourth Dist., New Orleans, May 24th, 1852.*

"I have examined, with much care and interest, Professor Mandeville's series of Readers, and am much gratified to observe that he has reduced the subject of punctuation and delivery to a complete system; and they possess such superior advantages over any others that I have ever examined, that I have adopted them as text-books in the public schools under my supervision."

\*.\* In July, 1852, Mandeville's Reading books were adopted and introduced in all the Public Schools of New Orleans.

*The following Resolution was unanimously adopted by the Board of Education of St. Louis, Oct. 12th, 1852.*

"Resolved, That Professor Mandeville's Series of Readers be substituted as text-books for Swan's Readers in the Public Schools of this city."

*From the late S. L. HOLMES, City Superintendent of Schools, Brooklyn.*

"Mandeville's Reading Books are used in all of the Public Schools of Brooklyn, and with great satisfaction and profit, both to teacher and pupil. As mere reading books, they are probably unsurpassed either in matter or system; but as a means of disclosing the true structure of our language, and pointing out the proper mode of parsing it, this series is believed to be altogether unequalled."

*From B. W. WRIGHT, Principal of Brooklyn High School:*

"I consider Professor Mandeville's system to be eminently original, scientific and practical, and destined, where ever it is introduced, to supersede at once all others."

Seventy-six teachers of the Public School Society of New-York city, having listened to Professor Mandeville's exposition of his system, adopted the following resolution:

"Resolved, That the Teachers of the Public School Society recommend the system of Professor Mandeville contained in his 'Elements of Reading,' &c., as worthy of the highest attention of their fellow teachers every where."

## CLASS-BOOK OF POETRY.

BY ELIZA ROBBINS.

Containing a judicious, beautiful, and interesting Collection of Poetry for the Use of Children in Schools, and private reading. 12mo.

Price 75 Cents.

*Extract from the Author's Preface.*

"In no way is a graceful and refined style of speech so naturally formed as by poetic language made thoroughly familiar to the young. 'I do not like poetry; I cannot understand it,' often say half-taught children. Give them the poetry of good writers, with a little necessary comment, and you will remove all obscurity from the most instructive and effective poetry, and all distaste to it. I have endeavored to do this in the following collection, and I trust that while it exhibits only 'things pure,' 'lovely, and of good report,' it may also give much pleasure, and be serviceable accordingly."

## GUIDE TO KNOWLEDGE.

BY ELIZA ROBBINS.

Price 63 Cents.

This contains a large amount of useful information, communicated in an entertaining and easy style of familiar questions and answers on every-day subjects, such as children are constantly asking questions about.

"The basis of this work is the 'Child's Guide to Knowledge—an elementary book which has been much used in England for many years,' and is particularly adapted to our own country and nation. It commences with questions and answers on those elementary topics which occupy the attention of the young mind, and ranges over the complete circle of useful knowledge. It is a storehouse of various information for the young. We know of no elementary book, that with the necessary aid of judicious instructors, and suitable illustrative helps, can be made more useful to youth. Accompanying, is a dictionary of technical terms. We cordially recommend it to the notice of teachers."—*Journal and Messenger*.

"Every parent who remembers how often he has been puzzled to answer in an intelligible manner the acute, yet simple questions put by a thoughtful child, will be glad to hail, in a book of this kind, a solution to a great extent of this difficulty. It is not, of course, to be expected that any volume will give an explanation to every question which a child may happen to put; for many such inquiries touch upon the profoundest subjects, and are not capable of being simplified in such a manner as to be brought satisfactorily home to the comprehension of a youthful mind; but so far as it was possible to give brief, clear, and pertinent answers on the various subjects appertaining to every-day life, it has been accomplished in this volume."—*Arthur's Home Journal*.

## THE SHAKSPEARIAN READER.

BY J. W. S. HOWS.

Price \$1 25.

This work is prepared expressly for the use of Classes in schools and the reading circle, and contains a Collection of the most approved Plays of Shakspeare, carefully revised, with introductory and explanatory notes.

"The method of the volume is first a brief reference to the history of the play, then the presentation of leading acts and scenes, connected by simple narrative, sufficient to keep up with the story—and, we may add, usefully send the pupil to an understanding study of the whole text. The work may profitably find its way in all of our seminaries of learning."

"This is a very handsome volume, and it will prove, we believe, a very popular one. Probably no man living is better qualified for the task of preparing a work of this kind than Professor Hows, who has long been a teacher of elocution, and from his lectures on Shakspeare, has acquired a high reputation for his masterly analysis of the characters of the great dramatist. The only fault that we find with his book is that he has left out the comic parts, and has given nothing of Falstaff. But his reasons for the omission are sound and discriminating."—*New-York Mirror*.

"The author has performed his work not, it would appear, as a mere compiler of a reading book, but of one who shares largely in reverence for Shakspeare. His selections are in good taste, he has omitted every thing, as far as we can see, that might offend the most fastidious, and yet preserved Shakspeare's spirit."—*Boston Advertiser*.

## FIRST BOOK OF ORATORY

An Abridgment of the above. One Volume, 12mo., of 237 pages. Price 62 Cts.

These works contain a larger number of elegant extracts than any similar ones, from the first American and English authors, among whom are Webster, Clay, Everett, Calhoun, Wirt, Randolph, Prentiss, Channing, Dewey, Burke, Brougham, Shakspeare, Byron, Scott, Hood, Bryant, and Longfellow, together with a complete digest of specimens of the oratory and poetry of all parts of the Union.

"A large and admirable selection of pieces for declamation, copious and varied, and well chosen with reference to speaking. The range of selection is almost universal, at least among modern writers in prose, verse and drama. They make a spirited collection of thought and rhetoric. The editor is a practical teacher of elocution, and evidently has a wide acquaintance with literature. It is as good a work of the kind as we ever saw."—*Evangelist*.

"It is an admirable collection of pieces for declamation, taken principally from eminent American orators."—*Tribune*.

"This is an exceedingly judicious and tasteful selection of extracts from various kinds of composition, designed for the use of schools, academies, and colleges. A large proportion of the extracts are from our most distinguished statesmen, and may be considered a monument of honor or patriotism, not less than of eloquence. There is a freshness and grace about the work that will render it peculiarly attractive."—*Libany Argus*.

"This is an excellent reading book for public seminaries. The selections are made with good taste, are brief, and of every variety. The entire field of American speeches and publications has been explored to gather them. They include extracts from Channing and Dewey, and Beecher, and Dow, Jr., from Webster, Clay, and Cass from Black Hawk and Red Jacket. They are generally elegant specimens of composition, expressive of patriotic and manly thought, and pure and noble sentiment."—*Journal of Commerce*.

"It contains a copious and excellent selection from the best orators, divines, and poets of England and America, and will be found of great value to the teacher of elocution and rhetoric. It will doubtless become a standard work in schools and colleges."

"It comprises the best selections we have ever seen compiled. It is worthy a place in every family library."—*New Haven Register*.

## MYTHOLOGY OF ANCIENT GREECE AND ITALY.

BY THOMAS KEIGHTLEY.

16mo. Price 42 Cents.

As mythology is closely connected with History and Philosophy, it is believed that its elements can be advantageously taught in our primary schools.

The present work is an abridgment of the author's larger treatise, and will be found well adapted to young persons.

The well-known reputation of the author is sufficient guarantee that the pupil who gets his first ideas of mythology from this book, will not have any thing to *unlearn*.

"This is precisely the volume which has long been wanted in schools. As an introductory manual, it contains all needful information relative to the gods and heroes of antiquity; and not an expression occurs which could offend the delicacy of the most scrupulous female."—*Christian Remembrancer*.

## A DIGEST OF ENGLISH GRAMMAR.

BY L. T. COVELL,

12mo. Price 50 Cents.

This work, which is just published, is designed as a Text-book for the use of Schools and Academies; it is the result of long experience of an eminently successful Teacher, and will be found to possess many peculiar merits.

The work is both Synthetical and Analytical, and its principles are strictly practical; the different subjects are carefully separated and methodically arranged, so that all difficulty as to what belongs to Etymology, Syntax, and Analysis, is entirely removed, and the latter, which is very properly placed in the first part of Syntax, is rendered quite as simple and easy of comprehension as the most plain portion of Grammar.

One subject is taken up at a time, and, when fully explained, models of Analysis are given, and examples for practice follow. The principles of the work are sound; the definitions are direct, short, and accurate. The rules, though ample, are few, plain and concise; and the language throughout the work is simple, clear, and expressive. The method of treating the Elementary Sounds, is that which is now highly approved. The principles of Derivation, and of Orthographic Analysis, are brought within the comprehension of the youngest learner.

*At a regular meeting of the Board of Education of Rochester, held June 12, 1858, the following resolution was unanimously adopted:*

"Resolved, That Covell's Digest of English Grammar be substituted for Wells' Grammar, as a Text-book in the public schools of this city, to take effect at the commencement of the next school year."

*Extract from the Minutes of a regular Meeting of Board of Education of Troy, May 31st, 1858.*

"Mr. Jones, from Committee on text books, and school librarian, moved, that Bullion's English Grammar be stricken from the list of text-books, and Covell's be substituted.—Passed."

*From forty-four Teachers of Public Schools, Pittsburg, Pa.*

"The undersigned have examined 'Covell's Digest of English Grammar,' and are of opinion that in the justness of its general views, the excellence of its style, the brevity, accuracy, and perspicuity of its definitions and rules, the numerous examples and illustrations, the adaptation of its synthetical exercises, the simplicity of its method of analysis, and in the plan of its arrangement, this work surpasses any other grammar now before the public; and that in all respects it is most admirably adapted to the use of schools and academies."

*From all of the Teachers of Public Schools of the City of Alleghany, Pa.*

"We, the undersigned, Teachers of Alleghany city, having carefully examined Mr. 'Covell's Digest of English Grammar,' and impartially compared it with other grammars now in use, are fully satisfied that, while it is in no respect inferior to others, it is in very many respects much superior. While it possesses all that is necessary for the advanced student, and much that is not found in other grammars, it is so simplified as to adapt it to the capacity of the youngest learner. We are confident that much time and labor will be saved, and greater improvement secured to our pupils in the study of this science, by its introduction into our schools; hence we earnestly recommend to the Boards of Directors of this city, its adoption as a uniform text-book upon this science in the schools under their direction."

## THE YOUTH'S GRAMMAR; OR, EASY LESSONS IN ETYMOLOGY.

BY F. W. RICORD, A. M.

1 neat volume, 12mo. well printed, 25 cents.

To limit a primary work upon Grammar to Etymology, though unusual, will, nevertheless, it is confidently believed, command the approval of all those who, like the author, have had experience of the almost insurmountable difficulties attendant upon the task of making intelligible the abstrusities of Syntax, before the child is sufficiently grounded in the simpler, but essential preliminaries, the comprehension of which it is the object of the present little work to facilitate.

## EXPOSITION

OF THE

### GRAMMATICAL STRUCTURE OF THE ENGLISH LANGUAGE.

BY JOHN MULLIGAN, A. M.

Large 12mo., \$1 50.

This work is a comprehensive and complete system of English Grammar, embracing not only all that has been developed by the later philologists, but also the results of years of study and research on the part of its author. One great advantage of this book is its admirable arrangement. Instead of proceeding at once to the dry details which are distasteful and discouraging to the pupil, Mr. M. commences by viewing the sentence as a whole, analyzing it into its proper parts, and exhibiting their connection; and, after having thus parsed the sentence logically, proceeds to consider the individual words which compose it, in all their grammatical relations. This is the natural order; and experience proves that the arrangement here followed not only imparts additional interest to the subject, but gives the pupil a much clearer insight into it, and greatly facilitates his progress.

#### *Extracts from Foreign Journals.*

"All who covet the possession of that rare faculty, the art of speaking and writing the English language with classic finish and strict accuracy, should possess themselves of this valuable work."—*Belfast News Letter*.

"We have no hesitation in stating our conviction, that the friends of an improved system of education in general, and of an improved mode of teaching our language in particular, will welcome with gratitude this valuable contribution to our grammatical literature."—*Belfast Mercury*.

"Mr. Mulligan's book contains much valuable matter for the consideration of teachers. It is a work which every pupil of the normal schools for training schoolmasters ought to study. The arrangement of the volume is excellent, and every part bears proof of extensive research and careful thought. With many of the incidental notes, and the articles on punctuation, versification, and other subjects, we have been much pleased. Mr. Mulligan shows himself to be a man of ingenuity and taste in general literature, as well as a learned writer on grammar."—(*London*) *Literary Gazette*.

"Mr. Mulligan carries out his plan well; and has presented us with a volume which we are happy in commending to the attention of instructors, as one containing a great deal of information and sound thinking, not hard to understand, exceedingly interesting, and above all adapted for the purposes of tuition."—*The British Quarterly Review*.

#### *From DR. JAMES W. ALEXANDER.*

"I thank you for the opportunity of perusing your work on the structure of the English language. It strikes me as being one of the most valuable contributions to this important branch of literature. The mode of investigation is so unlike what appears in our ordinary compilations, the reasoning is so sound, and the results are so satisfactory and so conformable to the genius and great authorities of our mother tongue, that I propose to recur to it again and again."

#### *Extract from a letter from E. C. BENEDICT, Esq., President of the Board of Education of City of New-York.*

"I have often thought our language needed some work in which the principles of grammatical science and of the structure of the language, philosophically considered, were developed and applied to influence and control the *usus* and *consuetudo* of Horace and Quintilian, which seem to me to have been too often the principal source of solecisms, irregularity and corruption. In this point of view, I consider your work a valuable and appropriate addition to the works on the language."

#### *From WM. HORACE WEBSTER, President of the Free Academy, New York.*

"The exposition of the grammatical structure of the English language by Professor Mulligan, of this city, is a work, in my opinion, of great merit, and well calculated to impart a thorough and critical knowledge of the grammar of the English language.

"No earnest English student can fail to profit by the study of this treatise, yet it is designed more particularly for minds somewhat maturer, and for pupils who are capable and have a desire, to comprehend the principles and learn the philosophy of their own tongue."

## FIRST LESSONS IN ENGLISH COMPOSITION.

BY G. P. QUACKENBOS, A. M.

12mo. Price 45 Cents.

These "First Lessons" are intended for beginners in Grammar and Composition, and should be placed in their hands at whatever age it may be deemed best for them to commence these branches—say from nine to twelve years. In the first fifty pages, by means of lessons on the inductive system, and copious exercises under each, the pupil is made familiar with the nature and use of the different parts of speech, so as to be able to recognize them at once. He is then led to consider the different kinds of clauses and sentences, and is thus prepared for Punctuation, on which subject he is furnished with well condensed rules, arranged on a new and simple plan. Directions for the use of capital letters follow. Next come rules, explanations and examples, for the purpose of enabling the pupil to form and spell correctly such derivative words as *having, debarring, pinning*, and the like, which are not to be found in ordinary dictionaries, and regarding which the pupil is apt to be led astray by the fact that a change is made in the primitive word before the addition of the suffix. This done, the scholar is prepared to express thoughts in his own language, and is now required to write sentences of every kind, a word being given to suggest an idea for each; he is taught to vary them by means of different arrangements and modes of expression; to analyze compound sentences into simple ones, and to combine simple ones into compound. Several lessons are then devoted to Style. The essential properties, purity, propriety, precision, clearness, strength, harmony, and unity, are next treated, examples for correction being presented under each. The different kinds of composition follow; and, specimens having been first given, the pupil is required to compose successively letters, descriptions, narrations, biographical sketches, essays, and argumentative discourses. After this, the principal figures receive attention; and the work closes with a list of subjects carefully selected, arranged under their proper heads, and in such a way that the increase in difficulty is very gradual. The work has received the universal approval of Teachers and the Press throughout the Union.

*From* RICHARD S. JAMES, *Principal of High School, Norristown, Ohio.*

"After a careful examination of the book, I am prepared to say that I know of no work superior or equal to it for simplicity of arrangement, correctness of definition, and adaptation to the wants of schools. It is the work."

*At a regular meeting of the Board of Education of Rochester, held Oct. 4, 1882, the following Resolution was unanimously adopted:*

"Resolved, That the First Lessons in English Composition, by Quackenbos, be adopted for the use of the Public Schools of Rochester."

*From* Principal of Clark Seminary, Va.

"Quackenbos' is, I am persuaded, the best book for beginners in composition now before the public."

*From* C. E. BENSON, *Gambler, Ohio.*

"After looking through the work (Quackenbos) that you left with me, I have determined to adopt it as a primary work in English Grammar as well as introduction to composition. I am glad that I met with it, as I had desired some work of the kind and did not know of any that would suit the purpose."

*From* M. M. BALDWIN, A. M., *Principal of Clarence Classical School.*

"Quackenbos' work on 'English Composition,' has been in use in this Institution during the last six months, and having given it a thorough trial with a number of classes, I am prepared to say that, in my opinion, it is preferable to every similar work now before the public."

*From the New-York Courier and Enquirer.*

"This book presents an exceedingly simple method of learning the principles of Grammar, and it is so completely adapted even to the understanding of the youngest pupil, that it cannot fail to be a great assistant to the teachers of schools. It is prepared with much skill and judgment, and from the suggestions of long experience. It will be found to possess a more than ordinary intrinsic value."

ADVANCED COURSE  
OF  
COMPOSITION AND RHETORIC.

A Series of Practical Lessons on the Origin, History, and Peculiarities of the English Language, Punctuation, Taste, the Pleasures of the Imagination, Figures, Style and its Essential Properties, Criticism, and the various departments of Prose and Poetical Composition; illustrated with Copious Exercises.

BY G. P. QUACKENBOS, A. M.

1 vol. 12mo. 450 pages. \$1 00.

The title of this Work fully sets forth its scope and character. It is an eminently clear and practical text-book, and embraces a variety of important subjects, which have a common connection, and mutually illustrate each other; but which the pupil has heretofore been obliged to leave unlearned, or to search for among a number of different volumes. Claiming to give a comprehensive and practical view of our language in all its relations, this "Advanced Course" views it as a whole, no less than with reference to the individual words composing it; shows how it compares with other tongues, modern and ancient; points out its beauties; indicates how they may best be made available; and, in a word, teaches the student the most philosophical method of digesting and arranging his thoughts, as well as the most correct and effective mode of expressing them.

Few works have received such unqualified commendations from the press and the public.

"We think this an excellent treatise; excellent both for self-instruction and for the use of schools. We are not familiar with any work of a similar character that is equally accurate and comprehensive."—*N. Y. Commercial Advertiser*.

"It is admirably adapted to self-instruction as well as for the use of schools and colleges."—*N. Y. Daily Times*.

"A carefully prepared and thorough educational text-book by an accomplished teacher."—*N. Y. Tribune*.

"A skilfully prepared manual, clear and practical throughout."—*Churchman*.

"Prof. Quackenbos is well known as the author of numerous works of high standing in the department to which the "Course of Composition" belongs. The present work is thorough in its treatment, and excellently arranged."—*Southern Literary Messenger*.

"The pupil who studies this book, under the tutoring of a capable instructor, cannot fail to become an efficient English scholar."—*Ledger, Lancaster, & C.*

GRAHAM'S ENGLISH SYNONYMES,  
CLASSIFIED AND EXPLAINED,

WITH PRACTICAL EXERCISES, DESIGNED FOR SCHOOLS AND PRIVATE TUITION; WITH AN INTRODUCTION AND ILLUSTRATIVE AUTHORITIES.

BY HENRY REED, LL.D.

1 vol. 12mo. Price \$1 00.

This is one of the best books published in the department of language, and will do much to arrest the evil of making too common use of inappropriate words. The work is well arranged for classes, and can be made a branch of common school study.

The Synonymes are treated with reference to their character, as generic and specific; as active and passive; as positive and negative; and as miscellaneous synonymes.

## HAND-BOOK OF THE ENGLISH LANGUAGE.

BY G. R. LATHAM, M. D., F. R. S.

12mo. Price \$1 25.

This work is designed for the use of students in the University and High Schools.

"A work of great research, much learning, and to every thinking scholar, it will be a book of study. The Germanic origin of the English language, the affinities of the English with other languages, a sketch of the Alphabet, a minute investigation of the Etymology of the language, &c., of great value to every philologist."—*Observer*.

"Dr. Latham, who is an able and accomplished ethnologist, comes to the work with a mind singularly well fitted for his task, and has been more successful in unravelling the mysteries and difficulties that involve the origin and formation of our vernacular than any other author we are acquainted with. We have often been amused and sometimes instructed by the English etymologies given by Harcourt in his learned work on 'The Doctrine of the Deluge,' but the work before us seems to go on firmer and more scientific ground. A mere glance at the contents of this volume will convince the most complete master of English that here we have the most perfect philosophical analysis of our tongue, which to advanced students must be almost invaluable."—*Christian Intelligencer*.

"His work is rigidly scientific, and hence possesses a rare value. With the wide-spreading growth of the Anglo-Saxon dialect, the immense present and prospective power of those with whom this is their 'mother tongue,' such a treatise must be counted alike interesting and useful."—*Watchman and Reflector*.

## HISTORY OF ENGLISH LITERATURE.

BY WILLIAM SPALDING, A. M.

PROFESSOR OF LOGIC, RHETORIC, AND METAPHYSICS, IN THE UNIVERSITY OF ST. ANDREW.

12mo. 413 pages. Price \$1 00.

The above work, which is just published, is offered as a Text-book for the use of advanced Schools and Academies. It traces the literary progress of the nation from its dawn in Anglo-Saxon times, down to the present day. Commencing at this early period, it is so constructed as to introduce the reader gradually and easily to studies of this kind. Comparatively little speculation is presented, and those literary monuments of the earlier dates, which were thought most worthy of attention, are described with considerable fulness and in an attractive manner. In the subsequent pages, more frequent and sustained efforts are made to arouse reflection, both by occasional remarks on the relations between intellectual culture and the other elements of society, and by hints as to the theoretical laws on which criticism should be founded. The characteristics of the most celebrated modern works are analyzed at considerable length.

The manner of the author is remarkably plain and interesting, almost compelling the reader to linger over his pages with unwearied attention.

From PROF. RAYMOND, *Rochester University*.

"This admirable volume supplies a desideratum, long felt by students of the vernacular.—Chambers' Cyclopædia of English Literature, Craik's Sketches (six vols.), and Sir Henry Ellis's learned contributions to the Pictorial England, are all too voluminous for the tyro, or the more general reader; while the brief manual, published by Chambers, in 1886 (the precursor of his Cyclopædia), is little more than a muster-roll of illustrious names. Shaw's 'Outlines of English Literature' comes nearer the mark, and is the work with which the present must most directly compete. Each is excellent in its way, but, as a text-book, Spalding's is decidedly the better."

"Its plan is judicious and its statements intelligent and impressive. As a mere reading book it will be found interesting."—*Buffalo Express*.

"The extracts given are of great interest as enabling the reader to form an idea of the literature of the different periods."—*Albany Transcript*.

**BY ALEXANDER REID, A. M.,**

**12mo. 572 pages. Price \$1 00.**

This work, which is designed for schools, contains the **PRONUNCIATION AND EXPLANATION** of all English words authorized by eminent writers.

A Vocabulary of the roots of English words.

An Accented List of **GREEK, LATIN, and SCRIPTURE** proper names.

An Appendix, showing the pronunciation of nearly 8000 of the most important **GEOGRAPHICAL** names.

It is printed on fine paper in clear type, and strongly bound.

And is unquestionably one of the best dictionaries for the school-room extant.

*From* C. S. HENRY, *Professor of Philology, History, and Belles-Lettres, in the University of the City of New-York.*

"Reid's Dictionary of the English Language is an admirable book for the use of schools. Its plan combines a greater number of desirable conditions for such a work, than any with which I am acquainted; and it seems to me to be executed in general with great judgment, fidelity, and accuracy."

*From* HENRY REED, *Professor of English Literature in the University of Pennsylvania.*

"Reid's Dictionary of the English Language appears to have been compiled upon sound principles, and with judgment and accuracy. It has the merit, too, of combining much more than is usually looked for in Dictionaries of small size, and will, I believe, be found excellent as a convenient manual for general reference, and also for the various purposes of education."

## **MANUAL OF ELEMENTARY GEOLOGY.**

**BY SIR CHARLES LYELL, M. A., F. R. S.**

**1 vol. 8vo. 512 pages. Price \$1 75.**

This is a reprint of the fourth London edition of a work of distinguished reputation, beautifully illustrated by **FIVE HUNDRED WOODCUTS**. Being the production of a writer who stands at the head of the department of knowledge which he has undertaken to explain, is sufficient guarantee for the invaluable character of the work for the scientific reader and observer, as well as for general use in our seminaries of learning.

"There is no branch of natural science where there is a more quickly recurring necessity for new editions of elementary books, than Geology. It is itself but the germ of a science, daily gathering fresh facts and extending its jurisdiction over new fields of observation. What was a satisfactory account of its discoveries a few years ago, is now obsolete. And among the scholars and observers who have done most to advance the science, and are most competent to elucidate its present condition, is the author of the volume before us."—*Charleston Mercury.*

## **PRINCIPLES OF GEOLOGY.**

**BY SIR CHARLES LYELL.**

**8vo. Price \$2 25.**

"It will only be necessary to announce this new and handsome edition of Lyell's standard work on Geology, to induce all lovers of this most interesting and instructive science, to secure a copy of the work, if possible; for every successive edition of such a work has a value which none of its predecessors had, inasmuch as new discoveries are being constantly made by the active author, and other distinguished geologists, which illustrate topics discussed in the work."—*Boston Traveller.*

## **HISTORY OF MODERN PHILOSOPHY.**

**BY M. VICTOR COUSIN. TRANSLATED BY O. W. WIGHT**

**2 vols. 8vo. Price \$3 00.**

This work contains a full exposition of Eclecticism, by its founder and ablest supporter; gives a collected account of the history of philosophy from the earliest times; makes a distinct classification of systems; affords brief yet intelligible glimpses into the interior of almost every school, whether ancient or modern; and a detailed analysis of Locke, which unanswerably refutes a sensualistic theory that has borne so many bitter fruits of irreligion and atheism.

## **LECTURES ON THE TRUE, THE BEAUTIFUL, AND THE GOOD.**

**BY M. VICTOR COUSIN. TRANSLATED BY O. W. WIGHT.**

**1 vol. 8vo. \$1 50.**

This is an important philosophical work, containing an exposition of Cousin's opinions upon the most momentous subjects to man. It is faithfully translated, and beautifully published. Under the head of "the True," the author considers the existence of Universal and Necessary Principles; their Origin and Value; and the existence of God as the Principle of Principles. Under that of "the Beautiful," he considers the Beautiful in Nature and Art, and has an interesting Lecture on French Art. Under that of "the Good," he contemplates the whole subject of private and public Ethics and God as the Principle of the Idea of the Good.

## **PHILOSOPHY OF SIR WM. HAMILTON.**

**EDITED BY O. W. WIGHT.**

**1 vol. 8vo. Price \$1 50.**

This handsome octavo volume is issued in a beautiful style, and is designed to be used as a text-book in schools and colleges. It embraces all the metaphysical writings of Sir Wm. Hamilton, one of the most noted philosophers and logicians of the day, whose writings deserve the attention and consideration of those who have charge of our seminaries of learning.

"Sir William Hamilton, though his predecessors, Stuart and Brown, were men of a world wide reputation, has sustained himself admirably in the chair which they occupied, and is probably destined to have higher honors awarded to him by posterity than either of them. With the severest logic, and a power of analysis that is well nigh matchless, he unites the most perspicuous and exact style, expressing the nicest shades of thought, with undeviating accuracy. And his writings display remarkable erudition as well as discrimination; he shows himself perfectly familiar with the theories and arguments of all who have gone before him, whether in earlier or later days; and while he renders due honor to each, he knows no such thing as being in bondage to a great name. And his crowning excellence is that he unites with the philosopher the christian; while he exercises his reason most vigorously and successfully within certain limits, no man bows more reverently than he before the authority of divine revelation."—*Puritan Recorder*.

"A philosopher who thinks like Aristotle; whose logic is as stern as that of St. Thomas, the lawgiver of the church; who rivals Muretus as a critic; whose erudition finds a parallel only in that of the younger Scaliger; whose subtlety of thought and polemical power remind us of the dauntless Prince of Verona, whose penetrating analysis reaches deeper than that of Kant."—*Daily Nat. Democrat*.

A DIGEST OF THE LAWS, CUSTOMS, MANNERS AND INSTITUTIONS  
OF THE  
ANCIENT AND MODERN NATIONS.

BY THOMAS DEW,

*Late President of the College of William and Mary.*

1 vol. 8vo. 663 pages. Price \$2 00.

On examination, it will be found that more than ordinary labor has been expended upon this work, and that the author has proceeded upon higher principles, and has had higher aims in view than historical compilers ordinarily propose to themselves. Instead of being a mere catalogue of events, chronologically arranged, it is a careful, laborious, and instructive digest of the laws, customs, manners, institutions, and civilization of the ancient and modern nations.

The department of modern history in particular has been prepared with unusual care and industry.

*From JOHN J. OWEN, Professor in New-York Free Academy.*

"I have examined with much pleasure Prof. Dew's 'Digest of the Laws, Manners, Customs, &c., of Ancient and Modern Nations.' It furnishes a desideratum in the study of history which I have long desired to see. The manner in which history is generally studied in our institutions of learning, is in my judgment very defective. The great central points or epochs of history are not made to stand out with sufficient prominence. Events of minor importance are made to embarrass the memory by the confused method of their presentation to the mind. History is studied by pages and not by subjects. In the wilderness of events through which the student is groping his way, he soon becomes lost and perplexed. The past is as obscure as the future. His lesson soon becomes an irksome task. The memory is wearied with the monotonous task of striving to retain the multitudinous events of each daily lesson.

"This evil appears to be remedied in a great degree by Prof. Dew's admirable arrangement. Around the great points of history he has grouped those of subordinate importance. Each section is introduced by a caption, in which the subject is briefly stated, and so as to be easily remembered. Thus the student having mastered the leading events, will find little or no difficulty in treasuring up the minor points in their order and connection. I trust the book will be adopted in our higher institutions of learning. I greatly prefer it to any history for the use of schools which I have seen."

The American edition has added a distinct and special chapter, giving the history of the United States its appropriate place in general history.

## HISTORY OF ENGLAND.

BY MRS. MARKHAM. REVISED BY ELIZA ROBBINS.

12mo. 387 pages. Price 75 Cents.

This work covers a period from the Invasion of Julius Cæsar to the Reign of Victoria, containing questions adapted to the use of schools in this country.

"Mrs. Markham's History was used by that model for all teachers, the late Dr. Arnold, master of the great English school at Rugby, and agrees in its character with his enlightened and pious views of teaching history. It is now several years since I adapted this history to the form and price acceptable in the schools in the United States. I have recently revised it, and trust that it may be extensively serviceable in education.

"The principal alterations from the original are a new and more convenient division of paragraphs, and entire omission of the conversations annexed to the chapters. In the place of these I have affixed questions to every page that may at once facilitate the work of the teacher and the pupil. The rational and moral features of this book first commended itself to me, and I have used it successfully with my own scholars.—*Extract from the American Editor's Preface.*

"Its literary and historical value is not inferior to any other, and it is therefore just the book that is needed in our schools."—*New-York Observer.*

"It is written with signal ability, and much attention is devoted to the internal or social condition of the people at successive epochs."—*Nat. Era.*

"Several good woodcuts illustrate the text, and altogether this is a very useful book."—*Churchman.*

"This work is not a dry compound of dates, and events, and names, but so presents the great facts of English History, as to interest and instruct the youthful student, and lead him to perceive the great moral and religious lessons with which they are richly fraught."—*Evergreen.*

"This book, as a school History of England, is not excelled in the better elements of such a work, by any one extant; at least, such is our opinion of it. It is instructive and interesting in a high degree."—*So. Lit. Mes.*

"This is an admirable compend of English history."—*Albany Argus.*

"It is an excellent class-book."—*N. O. Times.*

"This work is constructed on a plan which is novel and we think well chosen, and we are glad to find that it is deservedly popular, for it cannot be too strongly recommended, as adapted for the perusal of youth."—*Journal of Education.*

## HISTORICAL AND MISCELLANEOUS QUESTIONS.

BY RICHARD MAGNALL.

REVISED BY MRS. LAURENCE.

12mo. 396 pages. Price \$1 00.

The American authoress of this excellent book has made it peculiarly well adapted to the schools of this country by adding to it a chapter on the history and constitution of the United States, and by large additions on the elements of mythology, astronomy, architecture, heraldry, &c., &c. This edition is embellished by numerous cuts, a large portion of the work is devoted to judicious questions and answers on ancient and modern history, which must be very serviceable to teachers and pupils.

"This is an admirable work to aid both teachers and parents in instructing children and youth, and there is no work of the kind that we have seen that is so well calculated 'to awaken a spirit of laudable curiosity in young minds,' and to satisfy that curiosity when awakened."—*Commercial Advertiser.*

"This seems to us a very useful book, containing, as it does, much information on subjects not usually attended to in schools. Sufficient information is given on the subject of architecture, for instance, to enable the pupil to distinguish the different orders, and to understand the terms which he meets with in reading. Many of the terms of heraldry occur in ordinary reading which are not understood for want of such information as this book is intended to give. A similar remark may be made in regard to other subjects."—*Quarterly Review.*

## HISTORY OF ROME.

BY DR. THOMAS ARNOLD.

Three Volumes in One. 8vo. 970 pages. Price \$3 00.

Arnold's History of Rome is a well-known standard work, as full and accurate as Niebuhr, but much more readable and attractive; more copious and exact than Keightley or Schmitz, and more reliable than Michelet, it has assumed a rank second to none in value and importance. Its style is admirable, and it is every where imbued with the truth-loving spirit for which Dr. Arnold was pre-eminent. For Colleges and Schools this history is invaluable; and for private, as well as public libraries, it is indispensable.

"This history of Dr. Arnold has acquired a reputation that places it in a classic rank. To great intelligence and thoroughness are added that marked moral sense and that strict impartiality which impart special value to the works of the historian. The present reprint puts the work before us in a cheaper and more portable form than the editions that have been issued before."—*Watchman and Reflector*.

"Of the conscientious accuracy, industry, and power of mind which the work evinces—its clearness, dignity and vigor of composition—it would be needless to speak. It is eminently calculated to delight and instruct both the student and the miscellaneous reader."—*Traveler*.

## LECTURES ON MODERN HISTORY.

BY DR. THOMAS ARNOLD.

Large 12mo. 426 pages. Price \$1 25.

This volume is edited from the second London edition, with a preface and notes of Henry Reed, M. A., Professor of English Literature in the University of Pennsylvania, who has had in view its use, not only as a book for general reading, but as a text-book for the collegiate courses. The work is well calculated to inspire an interest in historical study.

"These Lectures, eight in number, furnish the best possible introduction to a philosophical study of modern history. Prof. Reed has added greatly to the worth and interest of the volume, by appending to each lecture such extracts from Dr. Arnold's other writings as would more fully illustrate its prominent points. The Notes and Appendix which he has thus furnished are exceedingly valuable."—*Evening Post*.

"Professor Reed has added greatly to the worth and interest of the volume, by appending to each lecture such extracts from Dr. Arnold's other writings as would more fully illustrate its prominent points. The notes and appendix which he has thus furnished are exceedingly valuable. No student or literary man, who has the least regard for the philosophy of history, should be without this book. So far as our knowledge extends, there is no other before the public which can be compared to it for interest and permanent worth."—*Courier & Enquirer*.

As a text-book on Ancient History for Colleges and advanced Academies, this volume is believed to be one of the best compends published.

## HAND-BOOK OF MEDIÆVAL GEOGRAPHY AND HISTORY.

BY WILHELM PUTZ.

TRANSLATED BY REV. R. B. PAUL, M. A.

1 Vol. 12mo. Price 75 Cents.

The characteristics of this volume are: precision, condensation, and luminous arrangement. It is precisely what it pretends to be—a manual, a sure and conscientious guide for the student through the crooks and tangles of Mediæval History. All the great principles of this extensive period are carefully laid down, and the most important facts skilfully grouped around them.

"This translation of a foreign school-book embraces a succinct and well arranged body of facts concerning European and Asiatic history and geography during the middle ages. It is furnished with printed questions, and it seems to be well adapted to its purpose, in all respects. The mediæval period is one of the most interesting in the annals of the world, and a knowledge of its great men, and of its progress in arts, arms, government and religion, is particularly important, since this period is the basis of our own social polity."—*Commercial Advertiser*.

"These works are remarkable for great condensation and luminous method."—*Tribune*.

"As text-books for study and reference these volumes will be found valuable assistants to the student."—*American & Foreign Church Union*.

## MANUAL OF MODERN GEOGRAPHY & HISTORY.

BY WILHELM PUTZ.

TRANSLATED BY REV. R. B. PAUL, M. A.

12mo. Price \$1 00.

This volume completes the series of the author's works on geography and history. Every important fact of the period, comprehensive as it is both in geography and history, is presented in a concise yet clear and connected manner; so as to be of value, not only as a text-book for students, but to the general reader for reference. Although the facts are greatly condensed, as of necessity they must be, yet they are presented with so much distinctness as to produce a fixed impression on the mind. It is also reliable as the work of an indefatigable German scholar, for correct information relating to the progress and changes of states and nations—literature, the sciences and the arts—and all that combines in modern civilization. The portion relating to our own continent has been carefully revised, so as to free it from mistakes which all foreigners are liable to make when speaking of our complex institutions of government. Appended to the work is a chronological table; and also an extended series of questions, designed to facilitate the use of the work in schools.

## HISTORY OF THE MIDDLE AGES.

BY GEO. W. GREENE.

1 Vol. 12mo. 450 pages. Price \$1 00.

This work will be found to contain a clear and satisfactory exposition of the revolutions of the middle ages, with such general views of literature, society, and manners, as are required to explain the passages from ancient to modern history.

Instead of a single list of sovereigns, the author has given full genealogical tables, which are much clearer and infinitely more satisfactory.

"The work before us, compiled principally from the French, by Professor Greene, of Brown University, is the fruit of much learning and research. It furnishes a brief though clear and well digested exposition of the leading revolutions of the middle ages, and is designed to introduce the student to an acquaintance with those various and complicated agencies which, out of barbarism and decay, slowly built up the nations of Modern Europe. The plan is judicious, and the execution is in the admirable literary taste which always characterizes the writings of Mr. Greene."—*Providence Journal*.

1 Vol. 12mo. Price \$1 00.

This work embraces a period from the fall of the Roman Empire to the French Revolution, and has been edited from the second English edition, by Prof. C. S. Henry, who has added a few notes. The whole work is made attractive by the clear and lively style of the author.

"M. Guizot, in his instructive lectures, has given us an epitome of modern history, distinguished by all the merit which, in another department, renders Blackstone a subject of such peculiar and unbounded praise. A work closely condensed, including nothing useless, omitting nothing essential; written with grace, and conceived and arranged with consummate ability."—*Boston Traveller*.

## MANUAL OF GRECIAN & ROMAN ANTIQUITIES.

BY DR. E. F. BOJESEN,

WITH NOTES AND QUESTIONS BY REV. THOMAS K. ARNOLD.

1 Vol. 12mo. Price \$1 00.

The present Manuals of Greek and Roman Antiquities are far superior to any thing on the same topics as yet offered to the American public. A principal Review of Germany says of the Roman Manual:—"Small as the compass of it is, we may confidently affirm that it is a great improvement on all preceding works of the kind. We no longer meet with the wretched old method, in which subjects essentially distinct are herded together, and connected subjects disconnected, but have a simple, systematic arrangement, by which the reader readily receives a clear representation of Roman life. We no longer stumble against countless errors in detail, which, though long ago assailed and extirpated by Niebuhr and others, have found their last place of refuge in our manuals. The recent investigations of philologists and jurists have been extensively, but carefully and circumspectly used.

"An admirable aid to the student of antiquities. We have never seen more accurate knowledge compressed within a smaller compass. Its arrangement is excellent, its style compact and precise, and those best qualified to judge, bear witness to its accuracy of detail."—*Observer*.

## ARNOLD'S FIRST LATIN BOOK;

REMODELLED AND REWRITTEN, AND ADAPTED TO THE OLLENDORFF METHOD OF INSTRUCTION.

BY ALBERT HARKNESS, A. M.

12mo. Price 75 Cents.

This book is designed to take the place of the American edition of Arnold's First and Second Latin Book, issued five years since. Under the labors of the present author, the work of Arnold has undergone radical changes, and been adapted to the Ollendorff improved method of instruction, and is superior to the former work in its plan and all of the details of instruction. While it proceeds in common with Arnold on the principle of imitation and repetition, it pursues much more exactly and with a surer step the progressive method, and aims to make the pupil master of every individual subject before he proceeds to a new one, and of each subject by itself before it is combined with others, so that he is brought gradually and surely to the history of the most difficult combinations of the language. But an important feature of this book is that it carries along the Syntax *pari passu* with the Etymology, so that the student not only is all the while becoming familiar with the forms of the language, but is also learning to construct sentences and to understand and to explain by general rules the mutual relations of their component parts.

*From N. W. BENEDICT, Prin. Grammar School, Rochester University.*

"Having thoroughly examined Harkness' Arnold's First Latin Book, and watched the results of its introduction into several seminaries of learning in this section of the State, I can safely say that I consider it superior to any of the primary Latin works with which I am acquainted. Its plan and execution are such as to render correct instruction in the Latin language, in its initiatory steps, practicable to a greater number of teachers than have hitherto been accustomed to instruct in that department, and such as to lay open the practical benefits of such instruction to very many who have not heretofore been thought to be in circumstances to derive any benefit from attention to classical studies."

*From W. E. TOLMAN, Instructor in Providence High School.*

"I have used 'Arnold's First Latin Book, remodelled and rewritten,' by Mr. Harkness, in my classes during the past year, and find it to be a work not so much 'remodelled and rewritten' as one *entirely new*, both in its plan and in its adaptation to the wants of the beginner in Latin."

*From J. R. BOISE, Professor of Ancient Languages, in Michigan University.*

"I have examined your First Book in Latin, and am exceedingly pleased both with the plan and execution. I shall not fail to use my influence towards introducing it into the classical schools of this State."

*From MR. WILLIAM RUSSELL, Editor of the First Series of the Boston Journal of Education.*

"The form which this work has taken under the skilful hand of Mr. H. is marked throughout by a method purely elementary, perfectly simple, gradually progressive, and rigorously exact. Pupils trained on such a manual cannot fail of becoming distinguished, in their subsequent progress, for precision and correctness of knowledge, and for rapid advancement in genuine scholarship."

*From GEORGE CAPRON, Principal of Worcester High School.*

"I have examined the work with care, and am happy to say that I find it superior to any similar work with which I am acquainted. I shall recommend it to my next class."

*From MR. A. P. S. STEWART, Principal of Hutton High School.*

"The clearness with which principles are stated and illustrated, and especially the syntax in which the nature and the relations of the different elements of a sentence are more fully developed than in works of a similar kind, have struck me as being among its chief excellencies. It is better suited to the wants of beginners than any other work with which I am acquainted."

## SECOND LATIN BOOK;

Comprising a Historical Latin Reader, with Notes and Rules for Translating, and an Exercise Book, developing a complete Analytical Syntax, in a Series of Lessons and Exercises involving the Construction, Analysis, and Reconstruction of Latin Sentences.

BY ALBERT HARKNESS, A. M.

12mo, Price 90 Cents.

This work is designed as a sequel to the author's "First Latin Book," recently published, and has already acquired a wide reputation. It comprises a complete analytical syntax, exhibiting the essential structure of the Latin language, from its simplest to its most expanded and modified form.

The arrangement of the lessons is decidedly philosophical, gradually progressive, and believed to be in strict accordance with the law of development of the human mind. Every new principle is stated in simple, clear and accurate language, and illustrated by examples carefully selected from the reading lessons which the student is required to translate, analyze and reconstruct—he is also exercised in forming new Latin sentences on given models. This, while it gives variety and interest to what would otherwise be in the highest degree monotonous, completely fixes in the mind the subject of the lesson both by analysis and synthesis.

*From J. F. RICHARDSON, Professor of the Latin Language and Literature, Rochester University.*

"I have examined it with considerable care, and I am glad to see this addition to the valuable series of classical works now issued by the Appletons.

"A faithful study of the work upon the plan indicated by the author, will greatly facilitate the student's acquisition of the general principles of the language, and prepare him for the intelligent reading of the Latin classics."

*From PROF. HAVEN, of the University of Michigan.*

"I am fully convinced that a faithful use of the First and Second Latin Books will place the pupil securely on the right track, and facilitate, more than any other elementary treatises with which I am acquainted, his thorough understanding of the language.

"I heartily wish that all students preparing for this College would study both books thoroughly."

*From PROF. ANDERSON, of Lewisburg University, Pa.*

"A faithful use of the work would diminish the drudgery of the student's earlier studies, and facilitate his progress in his subsequent course. I wish the work a wide circulation."

*From PROF. GAMMELL, of Brown University.*

"The book seems to me, as I anticipated it would be, a valuable addition to the works now in use among teachers of Latin in the schools of the United States, and for many of them it will undoubtedly form an advantageous substitute."

*From PROF. LINCOLN, of Brown University.*

"It seems to me, to carry on most successfully the method pursued in the First Book. Though brief, it is very comprehensive, and combines judicious and skillfully formed exercises with systematic instruction."

*From REV. J. A. SPENCER, D. D., late Professor of Latin and Oriental Languages in Burlington College, N. J.*

"The present volume appears to me to carry out excellently the system on which the late lamented Arnold based his educational works; and in the Selections for Reading, the Notes and Rules for Translating, the Exercises in Translating into Latin, the Analyses, &c., I think it admirably adapted to advance the diligent student, not only rapidly, but soundly, in an acquaintance with the Latin language."

*From J. J. OWEN, D. D., Professor of the Latin and Greek Languages and Literature in the Free Academy, New-York.*

"This Second Latin Book gives abundant evidence of the author's learning and tact to arrange, simplify, and make accessible to the youthful mind the great and fundamental principles of the Latin language. The book is worthy of a place in every classical school, and I trust will have an extensive sale."

**FIRST GREEK BOOK**, on the Plan of First Latin Book. Revised by J. A. SPENCER, D. D. 1 Vol. 12mo. Price 75 Cents.

**PRACTICAL INTRODUCTION TO GREEK PROSE COMPOSITION.** Revised by J. A. SPENCER, D. D. 1 Vol. 12mo. Price 75 Cents.

**SECOND PART TO THE ABOVE.** By J. A. SPENCER, D. D. 12mo. Price 75 Cents.

**GREEK READING BOOK.** New Edition, Revised and Corrected. Containing the substance of the Practical Introduction to Greek Construing and a Treatise on the Greek Particles; and copious selections from Greek authors, with Critical and Explanatory English Notes and a Lexicon. Revised by J. A. SPENCER, D. D. 1 vol. 618 pages. 12mo. Price \$1 25.

In the preparation of the above series, by thorough classical scholars and practical teachers, the utmost care has been devoted to a complete revision of Dr. Arnold's works; they have been rearranged and improved in many important respects, and made to conform, in an eminent degree, to the Ollendorff plan of acquiring languages.

*From N. W. BENEDICT, A. M., Prin. Grammar School, Rochester University.*

"I am specially pleased with the kind of help afforded in his Cornelius Nepos, which is such as to give the student a critical and accurate understanding of the text, and at the same time to stimulate his mind to greater exertion to apprehend the beauties of the language. The plan is designed and well adapted to make the knowledge obtained the *property* of the scholar."

*From R. B. TROUDI, Prof. of Ancient Languages, Norfolk, Va.*

"After having in constant use since their first appearance, Arnold's Series of both Latin and Greek books; my experience enables me confidently to pronounce upon their unrivalled merits. I state without fear of contradiction, that, even with greater labor and pains on the part of the teacher, equal progress cannot be made without, as can be with them. And they succeed admirably in awakening an interest in the pupil, and in making a lasting impression upon his memory. It is an application of Bacon's principle for forming an accurate man."

*From ISRAEL BOOTH, Supt. of Union School, Bucyrus, O.*

"Perhaps the most satisfactory recommendation I can give of Arnold's Classical Series is, that after using the Series for nearly two years, I shall continue to use it, in preference to all other books with which I am acquainted professing to fill the same space in a classical education."

*From A. HOLBROOK, Classical Teacher, Kirtland, O.*

"Having used Arnold's Series for the past year, I have found it a more efficient means for rapid and thorough acquisition, than any thing else of the kind that has come under my observation."

*From PROF. A. A. KEMBLE, Gainesville, Ala.*

"I have adopted Arnold's Series entire, and am much pleased with them. These works are introduced in several academies in this region, and are destined to supersede all others of the kind."

*From WM. J. ROLFE.*

"The Latin Prose Composition is an excellent sequel for the Introductory Latin Book. The outline of Syntax in the latter, struck me at first, as rather meagre, even for an elementary work, but I found in the former, the most complete system (and yet a very concise one) of Latin Syntax that I have ever seen in any work designed for use in academy or college."

"The First Greek Book is admirably adapted for beginners. It proceeds upon the analytic method of imparting or obtaining knowledge; taking first the elements in their simplest forms, and obtaining just conceptions of their true nature and power; and then by the synthetic process, determining their adaptedness, and relations to each other, and their character and power in combination. Upon this plan the learner's progress cannot fail to be rapid. With this text-book it must be easier to begin the study of Greek, and of course easier to proceed, than with any other that has come under our observation. The volume is of fine white paper, and clear type, in a high degree creditable to the taste and enterprise of the publishers."—*Worcester Palladium.*

## SELECT ORATIONS OF M. TULLIUS CICERO.

WITH NOTES, FOR THE USE OF SCHOOLS AND COLLEGES.

BY E. A. JOHNSON,

*Professor of Latin in the University of New-York.*

1 Vol. 12mo. Price \$1 00.

This edition of Cicero's Select Orations possesses some special advantages for the student which are both new and important. It is the only edition which contains the improved text that has been prepared by a recent careful collation and correct deciphering of the best manuscripts of Cicero's writings. It is the work of the celebrated Orelli, together with that of Madvig and Klotz, and has been done since the appearance of Orelli's complete edition. The Notes, by Professor Johnson, of the New-York University, have been chiefly selected, with great care, from the best German authors, as well as the English edition of Arnold.

*From THOMAS CHASE, Tutor in Latin in Harvard University.*

"An edition of Cicero like Johnson's has long been wanted; and the excellence of the text, the illustrations of words, particles, and pronouns, and the explanation of various points of construction and interpretation, bear witness to the Editor's familiarity with some of the most important results of modern scholarship, and entitle his work to a large share of public favor."

"This is a well edited edition of the Select Orations of the great Roman Orator, in which the text has been carefully, and we doubt not judiciously, amended. Of this, the elegant scholarship of Prof. Johnson is a sufficient pledge."

"It seems to us an improvement upon any edition of these orations that has been published in this country, and will be found a valuable aid in their studies to the lovers of classical literature."—*Troy Daily Whig.*

"The Notes are full, scholarly, and replete with learning and information, and altogether the work commends itself both to the teacher and the pupil."—*Bangor Mercury.*

## CICERO DE OFFICIIS.

CHIEFLY SELECTED AND TRANSLATED FROM ZUMP AND BONNELL, ENGLISH NOTES

BY THOMAS A. THACHER,

*Of Yale College.*

1 Vol. 12mo. Price 90 Cents.

In this edition, a few historical notes have been introduced in cases where the Dictionaries in common use have not been found to contain the desired information; the design of which being to aid the learner in understanding the contents of the treatises, the thoughts and connections of thought of the author, and to explain the grammatical difficulties, and inculcate a knowledge of grammatical principles. The Editor has aimed throughout to guide rather than carry the learner through difficulties; requiring of him more study, in consequence of his help, than he would have devoted to the book without it.

*From M. L. STOEVEY, Professor of the Latin Language and Literature in Penn. College.*

"I have examined with much pleasure Prof. Thatcher's edition of Cicero de Officiis, and am convinced of its excellence. The Notes have been prepared with great care and good judgment. Practical knowledge of the wants of the student has enabled the Editor to furnish just the kind of assistance required; grammatical difficulties are removed, and the obscurities of the treatise are explained, the interest of the learner is elicited, and his industry directed rather than superseded. There can be but one opinion with regard to the merits of the work, and I trust that Professor Thatcher will be disposed to continue his labors so carefully commenced, in this department of classical learning."

"The text is beautiful and correctly printed. The notes are neat, well arranged, and appropriate."—*Presbyterian.*

"A very elegant edition of this well known work."—*The Wisconsin.*

## THE WORKS OF HORACE.

WITH ENGLISH NOTES, FOR THE USE OF SCHOOLS AND COLLEGES.

BY J. L. LINCOLN,

*Professor of the Latin Language and Literature in Brown University.*

1 Vol. 12mo. Price \$1 25.

The text of this edition is that of Orelli, in the edition of 1843-44; the comparatively few readings of Orelli, not adopted, are given at the foot of the page. The most important various readings are also given in foot-notes. The method pursued in the preparation of the Notes, is the same as that followed by the Editor in his edition of Livy, except so far as it is modified by the character of the present author, and by the fact that his writings belong to a later stage in a course of classical studies. While the grammatical study of the language has been kept in view, it has been a cherished object to take advantage of the means so variously and richly furnished by Horace for promoting the literary culture of the student.

*From an article written by PROF. BÄHR, of the University of Heidelberg, and published in the Heidelberg Annals of Literature.*

"There are already several American editions of Horace, intended for the use of schools; of one of these, which has passed through many editions, and has also been widely circulated in England, mention has been formerly made in this journal; but that one we may not put upon an equality with the one now before us, inasmuch as this has taken a different stand-point, which may serve as a sign of progress in this department of study. The Editor has, it is true, also intended his work for the use of schools, and has sought to adapt it in all its parts to such a use; but still, without losing sight of this purpose, he has proceeded throughout with more independence. In respect to the text, all the demands which could be made of the editor are fully met, and yet the limits observed which are necessary in a school edition. In an Introduction, which precedes the text, the Editor gives a sketch of the Life of Horace with a critique of his writings, which is well suited to the purpose of the whole work, and is, in our view, entirely satisfactory. In the preparation of the Notes, the Editor has faithfully observed the principles (laid down in his Preface); the explanations of the poet's words commend themselves by a compressed brevity, which limits itself to what is most essential, and by a sharp precision of expression; and references to other passages of the poet, and also to grammars, dictionaries, &c., are not wanting; all other learned apparatus is omitted, on grounds which need no lengthened explanation. The entire outward execution of the work merits special and thankful acknowledgment."

*From the London Literary Gazette.*

"We call attention to this work, because it is the most useful school edition of Horace which we have yet seen. The Editor has evidently bestowed great pains and labor upon his task. The Notes, which are printed at the end of the work, and not at the foot of the page, display sound and accurate scholarship, without pedantry or any useless parade of learning. They contain just the kind of information which a young student requires. Altogether the book is most creditable to American scholarship, and deserves to be introduced into our own schools."

## SALLUST'S JUGURTHA AND CATILINE.

With Notes and a Vocabulary, by NOBLE BUTLER and MINARD STURGIS. 1 volume, 12mo. Price \$1.

The editors of this Edition of Sallust's "Jugurtha and Catiline," have devoted many years of arduous labor in correcting the text, and collating it with the most improved German and English editions. It is believed that it will be found superior to any other edition hitherto published in this country. In accordance with their Chronological order, the "Jugurtha" precedes the "Catiline" in this edition. The Vocabulary was prepared by the late William H. G. Butler. It will be found an able and faithful performance, not inferior in thoroughness or accuracy to any Classic School Vocabularies that have ever been published.

## LINCOLN'S LIVY.

SELECTIONS FROM THE FIRST FIVE BOOKS, TOGETHER WITH THE TWENTY-FIRST AND TWENTY-SECOND BOOKS ENTIRE. WITH ENGLISH NOTES FOR THE USE OF SCHOOLS AND COLLEGES. WITH AN ACCOMPANYING PLAN OF ROME, AND A MAP OF THE PASSAGE OF HANNIBAL.

BY J. L. LINCOLN,

*Professor of Latin Language and Literature in Brown University.*

12mo. Price \$1 00.

The text of this edition is chiefly that of Alscheffski; where other readings have been preferred, the reasons for the preference are usually given in the Notes. The Notes have been prepared with special reference to the grammatical study of the language; it is hoped, however, that they will also be found to embrace all necessary information relating to history, geography and antiquities.

This edition has already been adapted in nearly all the colleges of the country.

*From PROF. ANDERSON, of Waterville College.*

"A careful examination of several portions of your work has convinced me that, for the use of students, it is altogether superior to any edition of Livy with which I am acquainted. Among its excellencies you will permit me to name the close attention given to particles—to the subjunctive mood—the constant reference to the grammars—the discrimination of words nearly synonymous, and the care in giving the localities mentioned in the text. The book will be hereafter used in our college."

*From PROF. JOHNSON, of New-York University.*

"I can at present only say that your edition pleases me much. I shall give it to one of my classes next week. I am prepared to find it just what was wanted."

*From PROF. KINGSLEY, of Yale College.*

"I have not yet been able to read the whole of your work, but have examined it enough to be satisfied that it is judiciously prepared, and well adapted to the purpose intended. We use it for the present year, in connection with the edition that has been used for several years. Most of the class however have procured your edition; and it is probable that next year it will be used by all."

## QUINTUS CURTIUS:

LIFE AND EXPLOITS OF ALEXANDER THE GREAT.

EDITED AND ILLUSTRATED WITH ENGLISH NOTES.

BY WM. HENRY CROSBY.

12mo. 385 Pages. \$1.

*From PROF. JOHN J. OWEN, New York Free Academy.*

"It gives me great pleasure to add my testimonial to the many you are receiving, in favor of the beautiful and well edited edition of Quintus Curtius, by Prof. Wm. Henry Crosby. It is seldom that a classical book is submitted to me for examination, to which I can give so hearty a recommendation as to this. The external appearance is attractive; the paper, type and binding being just what a text-book should be, neat, clean, and durable. The notes are brief, pertinent, scholarlike, neither too exuberant nor too meagre, but happily exemplifying the golden mean so desirable and yet so very difficult of attainment. The work is highly creditable to the author and publishers, and will be followed, we hope, by similar contributions to the cause of classical learning."

## TACITUS' GERMANIA AND AGRICOLA.

WITH NOTES FOR COLLEGES. BY W. S. TYLER,

*Professor of the Greek and Latin Languages in Amherst College.*

1 Vol. 12mo. Price 62½ Cents.

It has been the endeavor of the Editor to bring down the literature of Tacitus to the present time, and embody in a small compass the most valuable labors of such recent German editors as Grimm, Günther, Gruber, Kiessling, Dronke, Roth, Rapeti, and Walther.

*From PROF. FELTON, of Harvard University.*

"I am much pleased with the book, and you seem to me to have discharged the duty of editor with becoming judgment and skill."

*From PROF. LINCOLN, of Brown University.*

"I have found the book in daily use with my class of very great service, very practical, and well suited to the wants of students. I am very much pleased with the Life of Tacitus, and the Introduction, and indeed with the literary character of the book throughout. We shall make the book a part of our Latin course."

*From PROF. PACKARD, of Bowdoin College.*

"I have given it such examination as my time would permit, and shall introduce it this year into my course of study."

*From MR. S. H. TAYLOR, Principal of Phillips' Academy, Andover.*

"I am highly pleased with it. It is decidedly the most inviting edition of the classics which has been published in this country."

*From PROF. OWEN, of the New-York Free Academy.*

"It is eminently worthy of a wide circulation. The Notes strike me as wisely adapted to the wants of the student, being neither too many nor too few, and displaying an accuracy and precision which will render them useful and acceptable to both teachers and pupils."

*From PROF. ROBBINS, of Middlebury College.*

"I have made use of the edition, and am free to say, that it is among the very best Latin text-books that have fallen under my notice."

## THE HISTORIES OF TACITUS.

WITH NOTES FOR COLLEGES. BY W. S. TYLER.

1 Vol. 12mo. Price \$1 25.

"The editor has at least endeavored to avoid the fault, which Lord Bacon says 'is over usual in annotations and commentaries, viz., to blanch the obscure places, and discourse upon the plain.' The indexes have been prepared with much labor and care, and, it is believed, will add materially to the value of the work."—*Extract from Preface.*

*From PROF. HACKETT, Newton Theological Seminary.*

"The Notes appear to me to be even more neat and elegant than those on the 'Germania and Agricola.' They come as near to such notes as I would be glad to write myself on a classic as almost any thing that I have yet seen."

*From PROF. S. H. TAYLOR, Principal of Phillips' Academy.*

"I have examined parts of it with some care, and am very highly pleased with it. The Essay on the style of Tacitus, the Preliminary Remarks, the judicious and scholarly Notes afford all the assistance which the student can wish for the study of this somewhat difficult author."

*From PROF. STUBBS, of Hanover College.*

"I take this opportunity of expressing the great pleasure with which I have used your editions of Tacitus (the Germania and Agricola, and the Histories). I earnestly hope you will complete the work by a similar edition of the Annals. Having made much use, particularly of the first, with several classes of intelligent young men, I feel at liberty to say, what I am glad to see is the opinion of our most eminent scholars, that the editor has succeeded in hitting the exact medium between some New-York editions and most Boston editions, by giving just what intelligent and faithful students require and ought to have. The Life of Tacitus and the Preliminary Observations seem to me of especial value of themselves and for the student. I place these editions in the same class with Prof. Woolsey's Tragedies, especially in their tendency to make philologists.

C. JULIUS CÆSAR'S  
COMMENTARIES ON THE GALLIC WAR.

WITH ENGLISH NOTES, CRITICAL AND EXPLANATORY; A LEXICON, GEOGRAPHICAL AND HISTORICAL INDEXES, &c.

BY REV. J. A. SPENCER, D. D.

1 Vol. 12mo. with Map. Price \$1 00.

The text which Mr. Spencer has adopted is that of Oudenorp, with such variations as were suggested by a careful collation of the leading critics of Germany. The notes are as they should be, designed to aid the labors of the student, not to supersede them. In addition to these, the volume contains a sketch of the life of Cæsar, a brief Lexicon of Latin words, a Historical and Geographical Index, together with a Map.

"The notes are judicious, and furnish valuable helps to the learner. The book is printed in beautiful style, and will no doubt be a favorite with teachers as well as students."—*So. Christian Observer*.

"A lexicon contained within the book, and compiled with especial reference to the text; a condensed historical index; maps, plates, clear print and strong binding, fill the requisites for an unexceptionable class-book."—*Baltimore Patriot*.

EXERCISES IN GREEK COMPOSITION.

ADAPTED TO THE FIRST BOOK OF XENOPHON'S ANABASIS.

BY JAMES E. BOER, PROFESSOR IN MICH. UNIVERSITY.

1 Vol. 12mo. Price 75 Cents.

These Exercises consist of easy sentences, similar to those in the Anabasis, in having the same words and constructions, and are designed by frequent repetition to make the learner familiar with the language of Xenophon. Accordingly, the chapters and sections in both are made to correspond.

"This book appears to be admirably conceived and executed; as an aid to the student in learning to write Greek after the most approved style, it probably has no superior."—*Christian Mirror*.

"We like it also, because, instead of aiming to give the pupil practice in a variety of styles, it places before him but a single model of Greek composition, and that the very author who combines in the greatest degree, purity of language and idiom, with a simplicity that both invites and rewards imitation."—*Christian Register*.

## SHORT & COMPREHENSIVE GREEK GRAMMAR.

BY J. T. CHAMPLIN,

*Professor of Latin in Waterville College.*

12mo, Price 75 Cents.

The aim of this volume is to exhibit the facts and principles of the language in the most practical and most summary form possible. For this purpose all theories and complications of system belonging to general grammar, have been avoided, and only their results used, thus fitting it to meet the real wants of the ordinary student of Greek, without embarrassing him or distracting his attention by what is unnecessary.

*From Rev. Mr. ANDERSON, New Orleans.*

"I believe the author has fully accomplished what he proposes in his preface. To those wishing to study Greek, I am satisfied he has presented a book which will much tend to simplify the study, to beginners—and at the same time without being too voluminous, presents as lucid and full an exposition of the principles of the language, as can be contained within so small a compass.

"The examples under the different declensions are full, and well selected; so as fully to illustrate the principles on which the rules are founded.

"His arrangement of Anomalous verbs we think excellent, and not loaded with superfluous matter.

"His chapter on the formation of words is appropriate, and a great desideratum to Tyros in the study.

## KUHNER'S GREEK GRAMMAR.

TRANSLATED BY PROFESSORS EDWARDS AND TAYLOR.

One large 12mo Volume. Price \$1 50.

This is a most concise and comprehensive grammar, based on a profound and accurate knowledge of the genius and principles of Greek grammar, arranged in a clear and satisfactory manner. The fullness of illustration, correctness of the principles advanced, as well as the perfect analysis to which the forms of language are subjected, are all that could be desired in a work of this kind.

*From Professor of Greek in Williams College.*

"I think highly of your edition of Kuhn's Greek Grammar. We have nothing in use among us that is equal to it as a comprehensive, systematic analysis of the language. In many respects the translators have much improved this edition, and I should be glad to have its pages more generally consulted by our young men."

*From Prof. GEO. BURROWS, Lafayette College.*

"I beg to tender you my thanks for the copy of the new revised edition of Kuhn's Greek Grammar, translated by Edwards and Taylor. The high character of this book is fully established, and the friends of Greek literature are under obligations as well to the publishers as to the translators for making it accessible to the students of our country."

## HERODOTUS.

Comprising mainly such portions as give a connected History of the East to the Fall of Babylon, and to the death of Cyrus the Great.

BY HERMAN M. JOHNSON, D. D.

PROF. OF PHIL. AND ENG. LIT., DICKINSON COLLEGE.

12mo. Maps. 185 Pages. 75 Cents.

## GREEK OLLENDORFF.

BY A. O. KENDRICK, D.D.,

*Professor of Greek Language and Literature in the University of Rochester.*

1 Vol. 12mo. Price \$1 00.

This is a progressive exhibition of the principles of the Greek Grammar, designed for beginners in Greek, and as a book for exercises in academies and colleges.

There is probably no elementary treatise upon the Greek language extant, which has in so short a time, secured so large a share of the confidence, popular favor and patronage of educators throughout the country, as this work. It seems exactly fitted for the purpose intended, viz., by instilling into the minds of the young the more simple elementary principles of the language, thus to prepare them for a more extensive and familiar acquaintance with the ancient Greek Classics.

"This volume contains the first rigid application of the Ollendorff system to the language, so far as the peculiarities of the Greek would permit; and it differs from other elementary works in the greater simplicity of its plan, and in the methodical exposition of the principles of the language. It appears to be particularly adapted to fix in the mind of the student those minute yet important points which are indispensable to a thorough and complete knowledge of this wonderful language"—*Hunt's Magazine*.

"We think the author pursues the only philosophical method of teaching this language."—(*Dover Morning Star*).

"It is an excellent publication, and is admirably adapted to the purposes in view."—*New Orleans Bee*.

## XENOPHON'S MEMORABILIA OF SOCRATES.

BY PROF. ROBBINS,

*Middlebury College.*

1 Vol. 12mo. Price \$1 00.

The text of the present edition is that of Kuhnert, with occasional alterations in pointing and things of minor importance. When it appeared desirable, various readings have been given in the Notes, and reasons for the one adopted briefly stated.

*From PROF. HARRISON, University of Virginia.*

"The Notes contain in much detail, the grammatical and other explanations, which it would be convenient for the learner to have placed before him, instead of having to refer to various books. I have no doubt that the Notes are very carefully prepared, and in accordance with the best authorities."

*From PROF. JOHN TURNER, JR., Kenyon College.*

"It has been very judiciously prepared, and is most admirably adapted for College Classes. The Notes (which are by no means calculated to do away with the necessity of study, but rather to give a proper direction to faithful industry and research,) display, in the editor, very great care, much philological learning and a thorough practical knowledge of the student's real wants.

"The typographical execution is most beautiful, and decidedly superior to any impression of Greek text I have yet seen."

*From PROF. A. S. PACKARD, Bowdoin College.*

"I have examined the work somewhat, and am pleased with it, as being creditable to our American scholarship. I shall recommend it to my classes."

While the publishers are thankful for such universal appreciation of the series, they will endeavor by all necessary and proper means to secure for them the continued large demands, which from year to year are constantly increasing.

The success, in this country, of the Ollendorff system, as applied by the above authors, to the German, Spanish, and Italian languages, is a sufficient guarantee of their combining the merits and avoiding the faults of all other grammars on these languages.

They are so prepared as to lead the learner by gradual steps, each perfectly simple and easy, from the first elements even to the nicest idioms of the various languages, comprehending, in the process, a complete mastery of grammatical rules and colloquial phrases.

These volumes are well known and almost universally used.

Professor Roemer's new method of acquiring the Foreign languages possesses numerous advantages hitherto undeveloped. It will facilitate and render the studies of the student pleasant and agreeable. Its philosophy is, IMITATION AND ANALOGY. Commencing with the ordinary maxims, proverbs, and moral reflections of life, it gradually proceeds to choice and familiar historic, romantic and poetic extracts, judiciously selected from the most prominent of the favorite English and American authors, translated into German, French, Italian, and Spanish, the several parts designed to serve as Mutual Keys. The superiority of such a system is quite evident. The student will find the sweetest poems of Longfellow and of Moore; extracts from Gibbon and Prescott, from Irving and Goldsmith, and from Webster and Everett, in Foreign languages in these Polyglot Readers. His familiarity with these authors, and the voluntary exercises in which he will naturally indulge, to peruse the finest portions of his favorite writers in a foreign dress, will materially facilitate his acquisition of the language and commend this system of Professor Roemer to immediate universal favor.

"This work is one of very great labor, and evidently of deep research. We have given it a careful examination, and are perfectly safe in saying we have never before seen any thing of the kind at all to compare with it. Our space will not permit us to give more than this general testimony to its value. Long as the title is, and much as it promises, our examination of the work proves that all the promises are fulfilled, and we think that no student of the French language should, for a moment, hesitate to possess himself of it. Nor, indeed, will it be found less useful to the accomplished French scholar, who will find in it a fund of information which can nowhere be met with in any one book."—*National Magazine*.

SEOANE'S, NEUMAN AND BARETTI'S  
SPANISH & ENGLISH, AND ENGLISH & SPANISH  
PRONOUNCING DICTIONARY.

BY MARIANO VELAZQUEZ DE LA CADENA,

*Professor of the Spanish Language and Literature in Columbia College, New-York, and Corresponding Member of the National Institute, Washington.*

One large Vol. 8vo. of more than 1,300 pp., neat type, fine paper and strong binding. Price \$5.

In the revision of this work more than eight thousand words, idioms, and familiar phrases have been added.

The pronunciation of the Castilian language is so clearly set forth in this Dictionary, as to render it well nigh impossible for any person who can read English readily, to fail of obtaining the true sounds of the Spanish words at sight.

It also contains in both languages the exact equivalents and correspondents of the words in general use, both in their literal and metaphorical acceptations.

Also, the technical terms most frequently used in the arts, and in chemistry, botany, medicine, and natural history, as well as nautical and mercantile terms and phrases,—most of which are not found in other Dictionaries.

Also, many Spanish words used only in American countries which were formerly dependencies of Spain.

The irregularities of the verbs in Spanish and English are here, for the first time, given in full, in their alphabetical order.

The work likewise contains a grammatical synopsis of both languages, arranged for ready and convenient reference.

*From His Excellency A. CALDERON DE LA BARCA, Secretary of Foreign Affairs, Spain, and late Minister Plenipotentiary to the United States.*

"It is a work which has long been required, and to which I would gladly have devoted myself, had I possessed the necessary time and talent for such an undertaking. I therefore rejoice to see it has been carried into effect by so able a scholar as Senor Velazquez; and from the examination I have been able to make of it, it appears to me he has been very successful in his performance. The elegance of the type and binding is still more easily observable.

"I entertain no doubt it will be welcomed both in colleges and amongst private individuals, since hitherto there has been no dictionary calculated to meet the wants of those who desire to acquire a thorough knowledge of our language. I trust its success may equal its merits."

*From His Excellency VALENTINE CANEDO, Captain General of Cuba.*

"The Pronouncing Dictionary of the Spanish and English Languages by Don Mariano Velazquez de la Cadena, published by you, having been examined, and its merit acknowledged, I have ordered it to be recommended by the Board of Education."

*From His Excellency MARIANO ARISTA, President of Mexico.*

"Having heard the favorable opinions which the first literati have made of the work, I have directed it to be announced in the *Official Gazette* and other papers of this capital; not doubting but that the intrinsic merit of the work itself will cause it to be sought after by every studious person."

## GRAMMAR OF THE SPANISH LANGUAGE.

WITH A HISTORY OF THE LANGUAGE AND PRACTICAL EXERCISES.

By M. SCHELE DE VERE,

OF THE UNIVERSITY OF VIRGINIA.

18mo. 273 pages. Price \$1.

## GERMAN & ENGLISH, AND ENGLISH & GERMAN PRONOUNCING DICTIONARY.

BY J. G. ADLER, A. M.,

*Professor of German Language and Literature in the University of New-York.*

One elegant large 8vo. of 1,400 pages. Price \$5 00.

The aim of the distinguished author of this work has been to embody all the valuable results of the most recent investigations in a German lexicon, which might become not only a reliable guide for the practical acquisition of the language, but one which would not forsake the student in the higher walks of his pursuits, to which its treasures would invite him.

In the preparation of the German and English Part the basis adopted has been the work of Flügel, compiled in reality by Heimann, Feiling, and Oxenford. This was the most complete and judiciously prepared manual of the kind in England.

The present work contains the accentuation of every German word, several hundred synonymes, together with a Classification and Alphabetical List of the Irregular Verbs, and a Dictionary of German Abbreviations.

The foreign words, likewise, which have not been completely Germanized, and which often differ in pronunciation and inflection from such as are purely native, have been designated by particular marks.

The vocabulary of foreign words, which now act so important a part, not only in scientific works, but in the best classics, reviews, journals, newspapers, and even in conversational language, has been copiously supplied from the most complete and correct sources. And it is believed that in the terminology of Chemistry, Mineralogy, the Practical Arts, Commerce, Navigation, Rhetoric, Grammar, Mythology, Philosophy, &c., scarcely a word will be found to be wanting.

The Second, or German-English Part of this volume has been chiefly reprinted from the work of Flügel. The attention which has been paid in Germany to the preparation of English dictionaries for the German student has been such as to render these works very complete. The student, therefore, will scarcely find any thing deficient in this Second Part.

## AN ABRIDGMENT OF THE ABOVE.

1 Vol. 12mo. 844 pages. Price \$1 50.

With a view of offering to the student of the German such a portion of his larger work as would embody the most general and important lexicographical elements of the language in the smallest possible compass, the author has gone over the entire ground of the larger work: revising, condensing, or adding, as the case might require. All provincialisms, synonymes, and strictly scientific terms, have been excluded from these pages, and every thing that might prove unnecessary or embarrassing to beginners, or to travellers and others, for whom a smaller volume is better adapted.

"This work evinces on every page the learning, care, fidelity, and judgment of a true scholar."—*Extract of a letter from Prof. Bux, Harvard University.*

"Having used Professor Adler's German Dictionary ever since its publication, I fully concur in the above opinion of its merits. I have only to add, that the careful manner in which Prof. Adler has investigated the language as employed by the great body of recent German writers, and the accuracy with which the best usage is explained in his definitions, make the work peculiarly valuable for English and American students."—*C. C. Fennell, Prof. of Greek, Harvard University.*

## PRACTICAL GERMAN GRAMMAR.

BY CHARLES EICHHORN.

12mo. Price \$1 00.

"The plan of this work consists in teaching the pupil by what is called the natural mode, in opposition to the Grammatical method. A child is taught to speak its native tongue by learning the words and the construction of sentences, without the assistance of rules. We have seen Grammars in other languages formed on this system, but this is the first systematic attempt to introduce the plan into the study of the German. We have no doubt the author has succeeded in producing an excellent text-book. One of the features which deserves praise, is the arrangement and construction of the sentences or examples in such a way as to take advantage of the analogies between the English and German, and thus facilitate the progress of the student. The new and poetic selections at the end of the Grammar, are intended as an introduction to the works of the best German authors."—*Prof. Churchman.*

GOETHE'S IPHIGENIA IN TAURIS.

TIERCK'S PUSS IN BOOTS.

BY J. G. ADLER,

PROFESSOR OF GERMAN LITERATURE IN THE UNIVERSITY OF THE CITY OF NEW YORK.

1 Vol. 12mo. \$1 50.

## A PROGRESSIVE GERMAN READER.

BY J. G. ADLER.

12mo. Price \$1 00.

The pieces are both prose and poetry, selected from the best authors, and are so arranged as to present sufficient variety to keep alive the interest of the scholar.

It is progressive in its nature, the pieces being at first very short and easy, and increasing in difficulty and length as the learner advances.

At the bottom of the page constant references to the Grammar are made, and the difficult passages explained and rendered. The notes, which at first are very abundant, diminish as the learner advances.

At the end is added a VOCABULARY of all the words occurring in the book.

## PRONOUNCING GERMAN READER.

TO WHICH IS ADDED, A METHOD OF LEARNING TO READ AND UNDERSTAND THE GERMAN WITHOUT A TEACHER.

BY J. C. CEHLISCHLAGER.

12mo. Price \$1 00.

"The author has been for many years a successful teacher of the German, his native tongue, in Philadelphia, and he has given in this book the fruits of an intelligent experience. The time has come when the old, humdrum method of learning languages—living languages certainly—should be abandoned, once and for ever. A living language should be learned by foreigners, just as it is by children. Pronunciation comes by imitation, phrases and idioms by example and repetition. The logic of language is an afterthought, something to be applied after the language is learned, not as a means of learning it."—*United States Gazette.*

## ITALIAN READER.

BY E. FELIX FORESTI, LL.D.

*Professor of the Italian Language and Literature in Columbia College, and in the University of the City of New-York.*

One neat volume. 12mo. Price \$1 00.

A Collection of Selected Pieces in Italian Prose, designed as a Class Reading-Book for beginners in the study of the Italian language.

"The selections in the Italian Reader are from popular authors, such as Botta, Manzoni, Machiavelli, Villani, and others. They are made so as not to constitute mere exercises, but contain distinct relations so complete as to gratify the reader and engage his attention while they instruct. This is a marked improvement on that old system which exacted much labor without enlisting the sympathies of the student. The selections from Manzoni, for example, are from the "*Promessi Sposi*," one of the noblest works of fiction ever issued from the press—a work so popular as to have gone through an incredible number of editions in Italy, while it has been translated into every language of Europe. The Reader contains six extracts from this novel, among which are the beautiful episodes of Father Cristoforo and the Nun of Monza, and a description of the famine and plague of Milan in the year 1590. The account of the plague rivals the celebrated one of Boccaccio in his *Decameron*. The idioms that occur in the selections are explained by a glossary appended to each. The Italian Reader can with confidence be recommended to students in the language as a safe and sure guide. After mastering it, the Italian poets and other classics may be approached with confidence."—*Savannah Republican*.

## ITALIAN & ENGLISH, AND ENGLISH & ITALIAN PRONOUNCING DICTIONARY.

BY F. C. MEADOWS, M. A.,

*Of the University of Paris.*

12mo. 714 pages. Price \$1 50.

This work is printed from the stereotype plates of the thirteenth English Edition.

The First Part contains all of the old words, contractions, and licenses used by the ancient Italian poets and prose writers.

Second Part, contains all of the various meanings of English verbs.

WITH A NEW AND CONCISE GRAMMAR,

### *Extract from the Preface.*

"In offering the present entirely new Dictionary to the Public, the sole object of the author has been to remove, as much as possible, all the difficulties attending the reading of the ancient Italian writers, who, for the innumerable beauties displayed in their productions, demand an eminent place among men of superior genius. Whether these master-pieces of literature were fostered by the benign temperature of their atmosphere, or by the copiousness of their language, excelled by none other living in point of harmony or strength, it is unnecessary to inquire at present; but this is certain, that these beauties have been and are appreciated by few, on account of the many contractions, antiquated words, and other poetical licenses then adopted, and almost inscrutable, particularly as those Dictionaries, esteemed the best through long use and indifferent knowledge, have in no way whatever introduced those words so necessary to the full understanding of the authors, and from which chiefly is transmitted the lustre of their sublime effusions. To clear away all these obstructions, and open the way to science, the insertion of such words has been the study and constant endeavor of the writer; and if he has deserved, and does deserve the public approbation, he will think himself fully compensated for the many laborious hours, and the several years devoted to this arduous undertaking.
